

Your Boat Has Been Serviced by an ABYC Certified Technician

What does this mean to me?

When you see the ABYC Certified Technician logo, you can trust that your boat will be serviced by a knowledgeable, professional technician. These marine technicians have been trained at the highest level by the American Boat & Yacht Council to ensure that your time on the water remains safe and enjoyable.

The American Boat & Yacht Council (ABYC) is an independent, non-profit organization that develops safety standards for the design, construction, maintenance, and repair of recreational boats. ABYC's nationally accredited certification program is designed to improve the quality of boat maintenance and repair and the professionalism of technicians.

ABYC Certified Technicians have demonstrated their technical expertise to their employers and customers by studying for and passing a difficult certification exam, which is verified by a third party educational auditor ensuring relevance and value. To keep up with ever changing technology, technicians must earn continuing education credits and are retested every 5 years.
