Transition to Practice: Measuring success of high-fidelity simulation

Presenters:
Lynne Delfosse BSN, RN (Education Manager – Clinical Simulation)
Mary K. Trudell MS, RN (Education Manager; Program Coordinator – Nurse Residency)

Objectives:
- Identify steps to develop a high-fidelity simulation program to facilitate transition to practice
- Describe the process of development and pre-post-simulation tools to measure critical behaviors in nursing practice
- Determine key learnings which may be applied to NPD Specialist practice setting

Nurse Residency

A) Overview:

B) NCSBN Recommendations:

C) Needs Assessment:

D) Strategic Initiatives:
Transition to Practice: Measuring success of high-fidelity simulation

Development of Simulation Tools

A) Literature review

B) Simulation Tools/Critical Behaviors

Results of Data

A) Pre and Post Assessment Data

B) Revisions

C) Challenges

What are your key take-aways?

•
•
•
Transition to Practice: Measuring success of high-fidelity simulation
