Gary Struble
PT, DPT, OCS, Cert. MDT

Nader Fahimi, MD

Sunday, September 17, 2017
9 am – 3 pm

NJ State Board of PT Examiners
Approval #
Approved for APTA – 5.0 Credits

Offered at:
Wayne Orthopedic Physical Therapy
450 Hamburg Turnpike
Wayne, NJ 07470

Dr. Gary Struble is well-respected across the entire North Jersey area as an exemplary spinal and orthopedic specialist. Gary has been recognized by The McKenzie Institute International as a Specialist in Mechanical Diagnosis and Treatment of Spine Injuries (MDT), and by the American Physical Therapy Association as a Board Certified Orthopedic Clinical Specialist (OCS). His specialist certifications in both Orthopedics and Spinal treatment distinguish him as part of the most highly credentialed 1% of all providers in the nation.

Nader Fahimi, M.D. is a member of American Association of Orthopaedic Surgeons, specializing in Sports Medicine and Arthroscopic Treatment of sport related injuries of the Shoulder, Hip, Knee and Ankle. Nader has devoted his career to his patients by constantly striving to learn more innovative and less invasive procedures, with smaller incisions, less pain, and shorter down-time. He teaches orthopedic residents at St. Joseph’s Regional Medical Center and Orthopaedic Learning Center in Chicago.

This course will integrate fundamentals of clinical decision making for evidence based practice. It will include topics on examination and treatment of the cervical and lumbar spine, using the Graston Technique® during different phases of recovery, and the role of the post-op protocol.

Upon completion of this course, the participant shall be able to:

1. Integrate evidence-based thought processes in situations during daily practice
2. Apply principles of clinical decision making to patients with acute and chronic movement dysfunction
3. Analyze determinants of appropriate evidence-based treatment techniques
4. Differentiate between common movement dysfunctions through examination and patient history components
5. Explore and incorporate IASTM during different phases of recovery
6. Consider and apply the post-operative protocol in clinical situations
7. Demonstrate step by step judgment to work through clinical decision making
