

Five-Year Strategic Priorities

Personalized Member Experience

Members will experience a rich, interactive network connecting them to each other and to resources, support, and tools tailored to their individual and institutional needs. Their experience will increasingly reflect their roles, preferences, and the challenges they are trying to address at any given time.

Reimagined Professional Learning

Members will have access to an expanded, reimagined portfolio of professional development options, including personal assistance in exploring options for institutions and individuals.

Expanded Partnerships & Collaboration

Members will be better able to strengthen higher education outcomes through IT with deeper connections across campus and among institutions and solution providers. EDUCAUSE, in turn, will expand purposeful, bi-directional partnerships with other associations and organizations.

New EDUCAUSE Membership Model

Collaborative Engagement

- **Working Groups** bring together higher education IT leaders to address technology challenges
- **Research Bulletins** provide insightful analysis of key IT developments and their impact on higher education
- **Events/Workshops** engage the higher education community

Campus CI Working Group
