

### **INFRASTRUCTURE VISIONARY**

## **TERRY BENNETT**

### **SENIOR INDUSTRY STRATEGIST – AUTODESK INC.**

Terry D. Bennett, LS LPF MRICS ENV SP LEED AP, is the senior industry strategist for civil infrastructure at Autodesk. He is responsible for setting the company's future vision and strategy for technology serving the planning, surveying, civil engineering, and heavy construction industries, as well as cultivating and sustaining the firm's relationships with strategic industry leaders and associations.

Bennett has been a practicing professional, global author and lecturer for over 30 years focusing on the impact of technology to the infrastructure and urban planning, engineering, and construction industries.

He holds multi-state licensing in both Land Surveying and Natural Resource Forest Management, is a Chartered Land Surveyor with the Royal Institution of Chartered Surveyors, a Credentialed Envision™ Sustainability Professional with the Institute for Sustainable Infrastructure, a LEED Accredited Sustainable Design Professional, and holds an FAA Remote Pilot Airman Certificate for Small Unmanned Aircraft Systems.

He currently serves as a Board Member of Harvard's Graduate School of Design's Sustainable Infrastructure Advisory Board, is an editorial board member of Informed Infrastructure Magazine, a charter member of the Institute of Sustainable Infrastructure and a member of its technical committee and a council member on the Urban Land Institute's Public Development and Infrastructure Council.

*Autodesk is a world leader in 3D design, engineering, and entertainment software.*
