

## Wilkinson Ecological Design - Project Manager

Salary/Compensation: Competitive, commensurate with experience

Location of position: Orleans, MA (Cape Cod)

### Description of employer

Wilkinson Ecological Design's mission is to protect and restore the integrity and biodiversity of the unique coastal ecosystems of New England. WED is a vibrant, cutting-edge company focused exclusively on Ecological Restoration from the design and permitting phases through to the construction and management phases. Since our founding in 1999, we have been a leader in hundreds of ecological restoration projects for land trusts, governmental agencies and private individuals. ### Work schedule:

Full time, year-round. Monday-Friday. Candidates must be willing to work schedules during our operating hours, beginning at 8am. Work schedules may also include occasional evenings and weekends. Specific information will be provided during interviews.

### General Job description:

The Project Manager oversees and manages the development of land management plans, design of restoration projects and the implementation of projects during the design phase. S/he works closely with the Director of Design to carry out the goals and priorities of the client and company in the permitting and design phases, and manages the transition through to the construction phase, collaborating with the Director of Client Services, the Director of Operations and the Production Manager.

### Qualifications:

- Master's in Landscape Architecture/Environmental Studies/ Natural Resources Management/related field plus 2 years relevant experience or Bachelor's plus 3+ years relevant experience. **Experience should be in a project manager role, preferably in landscape construction or environmental consulting.**
- Demonstrated expertise in presenting projects before regulatory compliance review boards seeking project approvals
- Familiarity/Experience with local laws, invasive plant species, native plant communities, landscape/bioengineering construction, ecological restoration
- Knowledge of invasive plant species, control/management techniques, Cape Cod native plant communities

Deadline to apply: n/a
