RIGHT-OF-WAY & POLE ATTACHMENT WORKSHOP

Ignore the rhetoric! Local authorities can still manage wireless telecomm and cable deployment in their communities. Local control is not lost!

Session Description

At this workshop, learn...

- ...what control communities/public utilities have.
- ...what's new in pole attachments and ROW management.
- ...the latest rollouts – 5G and small cell deployment by carriers.
- ...what ordinances, policies, and practices needed for effective management.
- ...how to avoid the pitfalls that abdicate your control.
- ...state legislative efforts to limit control.
- ...federal FCC activities impacting local control.

Answer these questions...

- Can they put a monopole wherever they want?
- How do I compute the FCC cable formula for my utility?
- How are other cities handling these issues?
- ...and more!

Who Should Attend?

Right-of-Way Managers • Utility Directors/General Managers • Public Works Directors • Project Managers • Elected Officials • Engineers • Planners • Design Consultants • City Attorneys • Anyone Likely to Become Involved in a Future ROW/Pole Attachment negotiation!
