

RP3 Application Workshop

May 16, 10am-2pm
MPUA Office, Columbia

SESSION INFORMATION

Find what makes a successful RP3 application from MPUA members. Our panel will share what data MPUA can provide and how to efficiently fill out the application.

Brent McKinney, *City Utilities of Springfield*

- Electric Transmission & Distribution Manager
- Chair of APPA's RP3 review panel
- Platinum Level RP3

Jared Stewart, *Hannibal Board of Public Works*

- Electric Line Superintendent
- Previous Chair of APPA's Transmission & Distribution Committee
- Platinum Level RP3

Cassandra Ludwig, *Carthage Water and Electric*

- General Counsel
- Earned Diamond Level RP3

"The RP3 application process itself will strengthen and benefit your utility. We all think we do a good job of managing our system and training our employees, but you need to be able to measure how you're actually doing. Through the RP3 self-review, you will be able to quantify and validate your strengths while also discovering some areas you thought were strong which actually need improvement."

-Chuck Bryant, GM of Carthage Water & Electric

REGISTRATION

- Registration deadline: **May 8**
- Lunch is provided
- RSVP to guarantee your seat by emailing training@mpua.org with the following information:

CITY, ATTENDEE NAMES and TITLES

Demonstrate your utility's value with a designation for reliability!

What are the benefits to my City?

Achieving a Reliable Public Power Provider (RP3) designation gives your city a nationally recognized certification that is increasingly relied upon by bond issuers, insurance companies, and industrial search firms as a mark of high quality. RP3 certification tells your citizen-owners that they have a utility they can be proud of and rely on.

What is RP3?

RP3 is an American Public Power Association program recognizing electric utilities through a self-review process that demonstrates high proficiency in four areas: reliability, safety, workforce development and system improvement. Criteria within each of the four RP3 areas are based upon sound business practices and recognized industry best practices.

Isn't this program just for large cities?

No. The program was actually started for smaller cities to help them develop the management resources generally available only to larger utilities. The program pays special attention to utilities with fewer than 5,000 customers, and many recipients are in this category.

Who should attend?

Municipal utility managers, electric superintendents, and staff assigned to complete RP3 applications.
