

**This bulletin announces an effective date for discontinuance of several CMA participant frame and spacer components.**

NFRC will be revoking the following CMA frame and spacer components associated with these manufacturers that are withdrawing from the CMA program.

- ADCO Products
- Brombal USA
- FM Graham
- Tormax Technologies

As of the effective date, November 7, 2014, frame and spacer components from these manufacturers may not be used in any product submitted for a Label Certificate or Bid Report. Label Certificates already approved before the effective date remain valid. Bid Reports generated before the effective date cannot progress to Label Certificates afterward and should not be used for preliminary code compliance. Label Certificates submitted, but not approved by the IA before the effective date, cannot be approved after the effective date.

Independent ACE Organizations: Please check your active frame assemblies, products and projects for use of components from the affected manufacturers. Please determine if the label certificate will be completed before the effective date. If a label certificate has been submitted for approval, contact the IA to confirm the label certificate can be approved before the effective date.

Inspection Agencies: New frame components or label certificates from the affected manufacturers may not be approved. NFRC recommends checking any pending label certificates and approving them before the effective date or informing the ACE the label certificate will not be approved.

NFRC is working to change the affected frame components' status to revoked for all frame and spacer components associated with the above-listed manufacturers. Once the status becomes revoked, the components are not visible to CMAST users. When revocation is complete, NFRC will notify all CMAST users to synchronize. The affected components will remain visible in the client prior to synchronization.

Contact [Jen Padgett](#) at 240-821-9515 with any questions.
