

National Fenestration Rating Council Bulletin

www.nfrc.org

January 7, 2016

Subject: NFRC Technical Bulletin 2016-02 (Information Only)

This important bulletin is to announce that effective immediately, **only WINDOW6/THERM6 shall be used for NFRC product certification**, and that **Technical Bulletin 2015-11 is rescinded**.

It has come to our attention that there is an issue with WINDOW7 that needs to be corrected and to halt any projects being conducted for NFRC certification. Inspection Agencies and Accredited Simulation Laboratories shall please adhere to the following:

Inspection Agencies are not to review/approve any uploaded files for Certification Authorization that used W7/T7 software. It is not necessary to reject the upload at this time but please have the submitting laboratory contact NFRC Staff immediately. You will be notified as to what action must take place after NFRC and the laboratory have reviewed the data files.

Any simulation laboratory that has been notified by the Inspection Agency and/or had work started or completed using W7/T7, contact [Dennis Anderson](#) for a full review of the WINDOW7 database. Once NFRC Staff and the laboratory have discussed and reviewed the files, a course of action will be given to the laboratory on how to proceed.

If you have any questions concerning the information in this *NFRC Technical Bulletin*, please contact [Dennis Anderson](#) at 240-821-9514 or [Scott Hanlon](#) at 240-821-9519.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.

Make sure NFRC is on your Approved Sender's list to continue receiving bulletins, billings and other important NFRC e-mails.

6305 Ivy Lane, Suite 140, Greenbelt, MD 20770
