February 1, 2016

## **Subject: NFRC – Technical Bulletin 2016-03 (Information Only)**

This bulletin is notification of one new technical interpretation added to the NFRC Technical Interpretations Manual and a revision to NFRC 101 for a company name change.

### <u>Item 1: TI-2016-01 Solid Panel Effective Conductivity</u>

TIPC approved TIR-2015-08 as TI-2016-01 on January 19, 2016. This TI specifies how to calculate an effective conductivity of homogeneous solid materials in direct contact with each other. The TI can be found in the 2010 TI Manual (E1A21), posted on the <u>Technical Documents page on the NFRC website</u>, and may be used immediately.

### Item 2: NFRC 101-2014\_E0A16

The revision to NFRC 101 was to change the name of Bayer MaterialScience to Covestro, as listed in Appendix C. Please be aware that materials not listed in NFRC 101 shall not be used for product certification. The main document and its addendum log may be found on the Technical Documents page of the NFRC website. Non-NFRC members may access the documents by clicking on this link to the Technical Documents page on the NFRC website. This revised document may be used immediately.

If you have any questions concerning the information in this *NFRC Technical Bulletin*, please contact <u>Dennis Anderson</u> at 240-821-9514 or <u>Scott Hanlon</u> at 240-821-9519.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.

Make sure NFRC is on your Approved Sender's list to continue receiving bulletins, billings and other important NFRC e-mails.
