NFRC – Technical Bulletin 2016-14

The NFRC Executive Committee has approved the WINDOW 7.4.14 and THERM 7.4.4 versions for immediate use.

The applications can be downloaded at the following LBNL website:

- The version of WINDOW7 to be used shall be version 7.4.14: https://windows.lbl.gov/software/window/7/index_7_4_14.html
- The version of THERM7 to be used shall be 7.4.4: https://windows.lbl.gov/software/therm/7/index_7_4_4.html

The new versions of WINDOW and THERM will correct issues when a zero-conductivity element is created in THERM when a shade system is imported from WINDOW and a nominal glass thickness was applied to shade systems causing modeling issues in THERM.

NFRC does not anticipate issues for users updating MDB and THM files to the new software.

The older version of WINDOW 7.4 needs to be uninstalled before this new version is installed. WINDOW versions are not backward compatible.

If you have any questions concerning the information in this NFRC Technical Bulletin, please contact [Scott Hanlon](#) at 240-821-9519 or [Steve Urich](#) at 240-821-9514.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.

Make sure NFRC is on your Approved Sender's list to continue receiving bulletins, billings and other important NFRC e-mails.
