

# National Fenestration Rating Council Bulletin

www.nfrc.org

July 31, 2017

The National Fenestration Rating Council (NFRC) is proud to announce that three NFRC documents have officially earned the American National Standard (ANS) designation from the American National Standards Institute (ANSI).

The three NFRC documents, with their new designations, are:

- [ANSI/NFRC 100-2017: Procedure for Determining Fenestration Product U-factors](#)
- [ANSI/NFRC 200-2017: Procedure for Determining Fenestration Product Solar Heat Gain Coefficient and Visible Transmittance at Normal Incidence](#)
- [ANSI/NFRC 400-2017: Procedure for Determining Fenestration Product Air Leakage](#)
  - (Non-members may access the documents via the NFRC website, [Technical Documents page](#).)

Now that the process is completed, NFRC will be limited in the changes that can be made to these documents as any changes made will require resubmission for public review and comment. Information on the document cycle and how it affects the timing of ballot implementation may be found on [THIS page of the NFRC community website](#).

In addition to the publication of the three ANSI/NFRC documents, the remainder of the technical documents have been published as 2017 documents, accepting all changes made during the 2014 document cycle and beginning anew with the 2017 cycle. The exceptions to this are:

- **NFRC 301 - 2017\_E0A0** *Standard Test Method for Emittance of Glazing Products*, which incorporates ballot results that were approved by membership at the Spring 2017 Committee Meeting, and
- **NFRC 601 - 2017\_E0A0** *NFRC Unit and Measurement Policy*, which was revised and approved by the Technical Interpretations Policy Committee (TIPC).

Any future changes to any document will be announced via bulletin and noting the changes. The full catalog of NFRC Technical and Program documents may be found on the NFRC website.

For more information on NFRC's documents, to join the ANS Standards Committee, or the NFRC document cycles, please contact [Robin Merrifield](#), NFRC Publications Manager, Programs, at (240)821-9513 or visit the [Committee's group page](#).

*NFRC envisions a future where every window, door, and skylight purchase*

*decision is made using the NFRC label to evaluate energy performance.*
