Changes to NFRC 713: Independent Verification Program (IVP) Document

A final draft to Section 2 of the *NFRC 713: Independent Verification Program* document has been completed by the Verification Policy Committee (VPC) for 2016. These changes to the Product Selection section are relative to the interim changes that were made to the IVP Selection Algorithm in October. The goal for the modification is to meet the EPA required goal of testing 10% of all ENERGY STAR Certified product lines. The VPC, working with NFRC staff, feels that they have found a process that is a fair and equitable way of achieving that goal and would like your feedback.

NFRC is providing ENERGY STAR® Partners a comment period on these changes. To download the section being changed, [CLICK HERE](#). Please provide comments by close of business on December 31, 2015 to ivp@nfrc.org.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.

Make sure NFRC is on your Approved Sender's list to continue receiving bulletins, billings and other important NFRC e-mails.
