

We are pleased to announce a recent update to the CMAST Smart Sync Client. This update includes the new feature to search for glazing components and the new feature to automatically download after upload.

Item 1: New Features

Glazing Component (Search)

- A glazing component "search by" filter is available when in the Smart Sync download screen. This allows the user to search for specified glazings via: Glazing Library, Manufacturer Name, Product Name, and/or NFRC ID.

Download After Upload

- A new selection in the upload screen makes it easier to automatically re-download all entities after uploading to the server. Server IDs or updated data will automatically be visible in the entity list and when re-signed into the CMAST application.

Item 2: Required Actions

Update Software

- No installation changes are required for this update. The next time Smart Sync is opened, users will be prompted to install the new Smart Sync Client.

The CMAST Smart Sync Training Manual is being updated to a User Manual with these new features and will be published when completed. Any questions or comments may be emailed to the NFRC Applications Team at cmassupport@nfrc.org.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.
