

NFRC Technical Bulletin 2010-01

PROCEDURES: Simulation Manual Garage-Rolling Door Addendum; Technical Interpretations
DATE: March 12, 2010
SUBJECT: Publication and implementation

This bulletin relates to publication and implementation of the following: Revision to Garage/Rolling Door Simulation Manual Addendum, Revision to 2001/2004 Technical Interpretations Manual, and one 2010 Technical Interpretation.

If you have any questions concerning the information in the *NFRC Technical Bulletin*, please contact Dennis Anderson at 240-821-9514; email: danderson@nfr.org or Scott Hanlon at 240-821-9519; email: shanlon@nfr.org.

Item 1: Revision to Simulation Manual Addendum for Garage/Rolling Doors

The revision to the Garage/Rolling Doors simulation manual addendum was a result to approved balloted language changes to NFRC 100 in San Antonio, TX. The language change required changes to the modeling procedures of Garage/Rolling Doors in the Simulation Manual which was approved the Technical Interpretation Policy Committee (TIPC). The Simulation Manual Addendum for Garage/Rolling Doors may be used immediately upon publication.

Item 2: Revision to TI-2009-07, Single vs. Dual Sealed Spacer Definition

TIPC approved the revision of an existing technical interpretation, TI-2009-07. It was necessary to further clarify the definition of a single seal versus dual seal spacer system and therefore TI-2009-07 has been revised and updated in the 2001/2004 Technical Interpretations Manual(E0A31). This technical interpretation may be used immediately upon publication.

Item 3: TI-2010-01, SHGC/VT 0 & 1 Table Revisions

TIPC approved TI-2010-01. The approval of this TI was decided with the joint discussions with the Certification Policy Committee since SHGC/VT ratings were involved. This TI regards the procedure for deciding the SHGC/VT 0 & 1 representative values to be used when filling in the NFRC CPD 2.0 Upload Spreadsheet when a new glass option is added to an existing certified product line. This TI will be published into a manual later this year. For now, this technical interpretation will be posted solely to the NFRC website and is to be used immediately upon publication.
