

NFRC Technical Bulletin 2012-04

DATE: June 21, 2012
SUBJECT: WINDOW6/THERM6 Software

This bulletin is to announce immediate implementation of updated WINDOW6/THERM6 software.

If you have any questions concerning the information in this *NFRC Technical Bulletin*, please contact Dennis Anderson at 240-821-9514; email: danderson@nfr.org or Scott Hanlon at 240-821-9519; email: shanlon@nfr.org.

Item 1: WINDOW6.3/THERM6.3

Newer version of WINDOW6 (ver 6.3.62) and THERM6 (ver 6.3.45) have been approved for immediate use when simulating non-complex glazing products. The newer versions may be downloaded from LBNL's website directly or can go to following link on NFRC's website: <http://www.nfrc.org/software.aspx>.

Be aware that you cannot have two active versions of WINDOW6.3 or two active versions of THERM6.3 installed on the same computer. In addition, once you install WINDOW6.3.62 and THERM6.3.45, you will no longer be able to use CMAST version 1.2.03. CMAST 1.2.03 only recognizes WINDOW6.3.54 and THERM6.3.38 and will be updated to recognize the latest versions of WINDOW/THERM as soon as possible.

There will be no sunset date at this time for WINDOW6.3.54 and THERM6.3.38 for the change to these newer versions did not affect the rating calculations. Until notified, versions of WINDOW 6.3.54 or 6.3.62 and THERM 6.3.38 or 6.3.45 will be accepted for NFRC certification.
