March 7-11
Williamsburg, VA

National Wildlife Rehabilitators Association presents NWRA Symposium 2017

Watershed Moments for Wildlife

This year's theme celebrates our successes in the wildlife field and draws attention to the everyday choices and actions that shape the future for our wild neighbors. A 'watershed moments' is a point in time that marks an important, often historic, change. There have been many proud watershed moments in wildlife conservation and rehabilitation. There have been many proud watershed moments in wildlife conservation and rehabilitation. A few examples of this success include: the recovery of peregrine falcons and bald eagles that were near extirpation before DDT was banned; rebounding of red-cockaded woodpecker populations thanks to increased protection of critical habitat; comeback of gray wolves after reintroduction in the American West; and, proliferation of green sea turtle nests after protective measures and public outreach.

While there are successes to celebrate, there also are many challenges that still lie ahead. From bats and bees to pangolins and box turtles, many wild animals are at a crossroads and need our help. While watershed moments often are thought of as major events, even small choices we make every day shape the future for our wild friends. Just as water in a small stream can travel hundreds or thousands of miles to the ocean, the decisions we make and the work we do on behalf of wildlife can have effects felt far away and long into the future. The lives we save, the stories we share, the research to which we contribute, and the legislation we support makes a difference for years to come.

The Symposium 2017 logo welcomes NWRA symposium attendees to the beautiful and wild state of Virginia, and reminds us our everyday behaviors and actions do "flow downstream" and have an impact on those around us. From the mountain streams of the Blue Ridge to the open waters of the Chesapeake Bay, we all are connected. Together, we can ensure success for wildlife!

Air Travel

The recommended airport is Newport News International Airport (PHF), about 20 miles by car from Great Wolf Lodge. Richmond International Airport (RIC) and Norfolk International Airport (ORF) are, each about 40 miles from the hotel. WE ENCOURAGE YOU TO PURCHASE AIR TRAVEL EARLY FOR BEST SELECTION.

Ground Transportation

For those driving or renting a car from the airport, parking at Great Wolf Lodge is free for hotel guests and conference attendees.

Depending on which airport you choose to fly into and out of there are various methods to get to Great Wolf Lodge. Each airport has shuttle service, taxi, rental car, Uber and Lyft services available. Visit our website, click on the Symposium tab to find the travel tab for a full description of airport transfer options.

March 7-11
Williamsburg, VA

Join NWRA and our Host, Wildlife Center of Virginia, for the 35th annual symposium! Each year, the Symposium is developed by wildlife rehabilitators for wildlife rehabilitators. NWRA invites you to join us in Virginia for this exceptional educational experience and for a networking opportunity.

Hotel

The Great Wolf Lodge Williamsburg, hotel and conference center, 549 East Rochambeau Drive, Williamsburg, VA 23188 is the location of Symposium 2017. The conference center offers complimentary WIFI for participant use in the meeting spaces and guest rooms. NWRA has negotiated a group rate of \$99.99 per night (plus 11% tax and a \$2.00 fee) for a Family Suite guest room. The Family Suite includes two queen beds, balcony or patio, microwave, mini-refrigerator, and coffeemaker. To view the room layout and learn more about the resort visit the website at, <https://www.greatwolf.com/williamsburg/suites>.

Great Wolf Lodge features many amenities, including a 24 hour fitness center and an indoor waterpark. For dining - the hotel features several on premise dining options, including a Dunkin Donuts, two quick service dining options and one sit down option at the Loose Moose Bar and Grill. In addition to onsite dining options, the Williamsburg area bus leaves daily from Great Wolf Lodge to give you a chance to get out and explore Williamsburg and area restaurants. The Tan-line bus service stops at Great Wolf Lodge; the route schedule is at: <http://gowata.org/Pages/busroutes.html>

How do I make my reservation at the Great Wolf Lodge to get the group rate?

- Call 1-866-972-9653
- Tell them you are with NWRA symposium and use code **1703NWRA**
- You are charged a one-night deposit at time of reservation
- Keep your confirmation number and review your email receipt for accuracy
- Book your room by February 13, 2017 to receive the group rate!

Reservations must be cancelled 72 hours prior to arrival and a \$40.00 cancellation fee is charged. If you cancel less than 72 hours of arrival, 100% of the room night deposit is lost.

The Schedule

Program outline as of October 2016. Sessions are concurrent with one another. Workshops are usually 2 or 4 hours in length and some are repeated. Repeats are not shown here.

Tuesday March 7	MORNING/AFTERNOON			
	Basic Rehabilitation	Patient Diagnostics	Taking Care of Business	Field Trips
EVENING (7:00 – 10:00 pm) Icebreaker Reception/Poster Session				
Wednesday March 8	MORNING (8:00 am – 10:30 am)			
	NWRA Annual Membership Meeting Opening Session Keynote, Denny Olson, Biologist and Storyteller Workshop Lecture (10:45 am – 12:45 pm)			
	AFTERNOON (1:00 – 5:00 pm)			
Avian Imping Workshop		Wound Management Workshop	Stakeholders	Waterbirds
EVENING (7:00 – 9:00 pm)				
Microscopy Open House		Rabbit Roundtable	TBA	Workshop Lectures
Thursday March 9	MORNING (8:00 am – Noon)			
	Basic Turtle Rehab Workshop	Workshop Lectures	Nutrition	Education and Training
	AFTERNOON (1:00 – 5:00 pm)			
Avian Bandaging Workshop	Public Outreach	Infectious Disease/ Toxicology	Herps	
EVENING (7:00 – 9:00 pm)				
Squirrel Roundtable	Euthanasia	Storytelling	Enrichment/Caging	
Friday March 10	MORNING (8:00 am – Noon)			
	Adult Avian Critical Care Workshop	Behavior	Small Mammals	Raptors
	AFTERNOON (1:00 – 5:00 pm)			
Mammal Bandaging Workshop	Physiology	Maintaining Wilderness	Avian	
EVENING (festivities begin at 6:00 pm) Banquet				
Saturday March 11	MORNING (8:00 am – Noon)			
	Songbird Splinting Workshop	Wildlife Parasitology Workshop	Large Mammals	Veterinary
	AFTERNOON (1:00 – 3:00 pm)			
More Mammals	Research	General	Symposium Hosting Info Session	
CLOSING General Session (3:10 – 3:30 pm)				

Pre-Conference Seminars

Patient Diagnostics

This largely hands-on, full day course is designed to provide rehabilitators an opportunity to practice common procedures in evaluating and diagnosing a patient, from intake and general exam through necropsy and sample collection. Participants work in pairs with one adult bird and one adult mammal carcass. Instructors assume participants already have some experience doing physical exams and basic stabilization of patients.

This workshop focuses on practical, low-cost diagnostics to better understand what is affecting your patients and to help determine what is needed to treat them. Emphasis is on techniques that can be done in-house, though preparation of samples to be sent for outside testing is also addressed. Wet lab activities are supplemented with brief didactic lectures to illustrate certain techniques or conditions. Using this approach, the workshop covers general palpation, ophthalmic exam, crop wash, ear exam and swab, nasal flush, skin scraping, fecal and urine collection, and blood collection from the live patient (although attendees only use carcasses and models). Each person then conducts a diagnostic necropsy on their 'patient', using this opportunity to demonstrate some comparative anatomy, and collecting samples for additional diagnostics. The afternoon is spent preparing, examining and interpreting the samples. All participants receive a Certificate of Attendance for attending the entire 8-hour Seminar. Participants must provide a pen or pencil.

This seminar is offered Tuesday, March 7th from 8:00 am to 4:30 pm. SEMINAR SPACE IS LIMITED. SPACE IS FILLED ON A FIRST-COME, FIRST-SERVED BASIS. Cost is \$85 (refundable if full). Advanced payment is required with Symposium registration.

Basic Wildlife Rehabilitation

This seminar is for those new to or those considering entering the field and gives an introduction to and explanation of wildlife rehabilitation: networking with experienced rehabilitators, phone skills for the public, establishing a veterinary relationship, and necessary record keeping. Hands-on learning on avian and mammalian carcasses: full physical exam, assessment of dehydration, appropriate fluid therapy protocol, selection of the correct syringe and needle, practicing subcutaneous and intramuscular injections, tube feeding, and basic stabilization bandaging. Included is an overview of wildlife disease, proper cage cleaning and disinfection, housing for different species with different impairments, and release considerations. Discussions include learning to say no, offering quality vs. quantity care, and dealing with difficult issues.

The recommended text for this seminar is NWRA's Principles of Wildlife Rehabilitation: The Essential Guide for Novice and Experienced Rehabilitators (Moore and Joosten), revised 2008. The reduced cost for this book is \$65 and can be purchased during registration or at the symposium.

View it online at:

<https://nwrwildlife.site-ym.com/store/ListProducts.aspx?catid=374883>

This seminar is offered Tuesday, March 7th from 8:00 am to 5:00 pm. SEMINAR SPACE IS LIMITED. SPACE IS FILLED ON A FIRST-COME, FIRST-SERVED BASIS. Cost is \$60 (refundable if full). ADVANCED PAYMENT IS REQUIRED WITH YOUR SYMPOSIUM REGISTRATION.

Taking Care of Business Seminar

Learn from successful professionals what is necessary to be strong and successful as a wildlife rehabilitation organization. The non-animal aspects of operating an organization—fundraising, accounting, facilities management, strategic planning, personnel management, volunteer recruitment—are not what most people want to do when entering the field. However, without effective financial and human resource management, wildlife care never will be all that it can be. Learn how to master the art and science of organizational management.

This seminar is offered Tuesday, March 7th from 8:00 am to 4:00 pm. SEMINAR SPACE IS LIMITED. SPACE IS FILLED ON A FIRST-COME, FIRST-SERVED BASIS. Cost is \$50 (refundable if full). ADVANCED PAYMENT IS REQUIRED WITH YOUR SYMPOSIUM REGISTRATION.

Field Trip

Wildlife Center of Virginia

Come to the mountains and visit the Wildlife Center of Virginia, located in Waynesboro, Virginia! The Wildlife Center of Virginia is one of the nation's leading hospitals for native wildlife, with the mission of "teaching the world to care for and to care about wildlife and the environment." The Center admits an average of 2,500 patients each year, a variety of birds, mammals, reptiles, and amphibians that call Virginia home. The Center operates out of a 5,700 square-foot building, built in 1995. This structure includes the veterinary clinic, diagnostics laboratory, operating suite, and radiology room, as well as offices for administration and outreach staff. The Center also has an array of outdoor facilities in the National Forest, including a variety of large flight pens, a two-acre bear enclosure, an aviary, deer fawn pens, turtle yards, and non-releasable educational enclosures.

Two separate trips depart from the Great Wolf Lodge on Tuesday, March 7. The first bus leaves the hotel promptly at 7am and returns around 3:30 pm; the second bus leaves at 9am and returns around 5:30 pm. Each Trip is limited to 38 people. The field trip includes motor coach transportation, lunch, and wine tasting at Grayhaven Winery. Field trip cost is \$50.00 per person. Sign up on the Symposium registration form, ADVANCED PAYMENT IS REQUIRED with your registration. Once you are registered for a field trip you are contacted regarding the lunch options. PLEASE plan your travel time carefully to arrive at the Great Wolf Lodge prior to field trip departure time. No refunds after February 13.

Tuesday Evening Events

Icebreaker Reception

The Icebreaker is a casual event, allowing time to relax after your travel to Virginia. Enjoy light snacks and cash bar, link up with old friends and make a new one. During this time raffle and silent auction items will be on display.

The NWRA poster session also takes place during the Icebreaker event. View the posters and engage the presenters about their research or topic. Enjoy the conversation, even use it to break the ice with other attendees during the week.

The Program

The Symposium program is four full days of concurrent sessions with a program built to give you choices each day. Your registration fee includes attendance to all session speakers, Wednesday thru Saturday, workshops and seminars are an additional fee. The Symposium Program Committee strives to offer valuable and useful content to help rehabilitators, veterinarians, and educators improve wildlife care and treatment. All presentations and events take place at the Great Wolf Lodge Williamsburg, unless stated otherwise.

Sessions

Each session is two to four hours in length with a series of presentations on the topic. Sessions are open to all registrants and do not require signup. Check the list below for exciting previews. Visit www.NWRAwildlife.org in December for an update with additional listings.

Join us for an entertaining and educational **Opening Session** with Professor Avian Guano, Bir.D -- also known as Denny Olsen! Denny has been a student and teacher of the natural world for more than 30 years, and is well-known for his theatrical performances and speeches. Denny strongly believes in encouraging all ages to think about how nature and people are connected. If you love the performance and storytelling vibe, join Denny later in the evening for a special **Storytelling** session on **Enhancing your Storytelling Abilities** (and charisma!)

There are several presentations on our feathered friends in the **Avian Session**:

- Reducing Stress with Feeding for the Bird and the Rehabilitator
- Chimney Swift Rehabilitation
- Hand-rearing and Rehabilitation of North American Swallows
- More than just a Perch - Creating Caging that Works for You and Your Patients!

For those who rehabilitate birds of prey, the **Raptor Session** has a lot to offer:

- Who Goes To See The Wizard? The Rehabilitation / Falconry Interface
- Raptor Feather FUNDamentals
- Managing Feather Contaminants on Wild Raptors: A Case Series
- Notable Cases In Raptor Care Version 2.0

Are aquatic avian species your thing? The **Waterbird Session** includes:

- Thinking Like a Duck: Mallards in the City
- The Trouble With Tropicbirds
- Raising a Colony of Wedge-tailed Shearwaters
- Intricacies and Quirks of Grebe Rehabilitation
- Problematic Pelicans
- Hand Rearing Cormorants

Mammal fans can stay very busy this year! The **Small Mammal Session** features:

- Tiny Feats for Tiny Feet! Mouse Rehabilitation
- Virginia Opossum Care for the 21st Century
- Reducing Morbidity and Mortality in Infant Squirrels
- Bringing up Baby Bats

The **Large Mammal Session** contains:

- Rehabilitating Orphaned and Injured Beavers
- Bobcat Rehabilitation
- Raising Coyotes: Not Your Average Pup
- The Elusive Fisher: Using Biology to Guide Its Care in Rehabilitation
- Working with the North American Porcupine -A Sticky Subject

And more mammal topics are covered with species-specific evening roundtable discussions!

No matter what species you treat, disease prevention and treatment is important. Our **Infectious Disease/Toxicology Session** features

- Understanding and Treating Mange in Wild Animals
- How to Differentiate Between Patients Suffering from Bromethalin Exposure, Glioblastoma (brain tumor) and Aleutian Disease Virus (ADV) in a Wildlife Hospital Setting
- Pesticide Toxicosis as a Common Cause of Mortality in Red-shouldered Hawks

The **Physiology Session** helps rehabilitators better understand their patients:

- The Physiological Side of Stress
- Come to Your Senses: Managing Conditions of the Ears, Eyes, and Nose of Wild Patients
- Dental Examination and Pathologies in the Mammal Patient
- Understanding Fractures

And the **Nutrition Session** helps rehabilitators learn how to keep their patients at their healthiest with

- Nutrition 101
- Wild Food Composition: Duplicating Nature's Nutrient Profiles
- Nutritional Supplements: What, Why, and How

It is always important to keep our patients wild; our **Maintaining Wildness Session** focuses on

- Fostering For Freedom
- Red and Gray: The Introduction of Surrogate Foxes to Their Kits
- Post-release Survival and Behavior of two Captive-reared Beaver
- A Method of Hacking Orphaned Northern Harriers

There is a lot of great information in both **Education & Training** and **Public Outreach** Sessions

- Wildlife Rehabilitators as a Source for the Public
- Diving into Fundraising, Public Relations, and Social Media-Part 2!
- Faux Fur, Real FUN: Inspiring the Public without Power Points, Ambassador Animals, or Biofacts
- Answering the Call of the Wild
- Leading by Example: Considerations for Photo Sharing
- The Right Bird for the Job or the Right Job for the Bird
- Educational Bird Selection Criteria: The First Step in Welfare
- Training Small Owls to be Educational Ambassadors
- Well, That's the Way I've Always Done it—Teaching the Old Rehabilitator New Tricks
- Plush animals, Who Knew They Could Be Educational?

Our **Stakeholders Session** emphasizes the importance of working together Wildlife Rehabilitation:

- Making a Meaningful Connection with Your Local Health Department
- Sharing Ideas, Technology, and Data to Prepare for the Coming Storm
- Re-claim, Reuse, Re-lease

The **Research Session** has insights from our colleagues

- Effects of Keel Cushions on the Behavior of Western Grebes Entering Rehabilitation
- A Retrospective Analysis on Anthropogenic Causes of Patient Admission to Select Wildlife Rehabilitation Facilities in North America [2011-2015]
- A Retrospective Study on Wildlife Affected by Glue Traps from Selected Wildlife Centers [2011-2015]

And more great topics can be found in the **General, Euthanasia, Enrichment, and Behavior Sessions!**

Workshops

Adult Avian Critical Care—This workshop focuses on emergency procedures such as fluid therapy, catheter placement, air sac cannulation, cardiopulmonary resuscitation, stabilization of fractures, wound management, and appropriate use of analgesics and antibiotics.

Avian Imping Techniques—The art of imping, or feather repair, is essential to any rehabilitator that has to deal with feather damage, especially in raptors. In birds with injuries that require intensive care and small cages, broken feathers almost are inevitable. Instead of spending the money, effort, and space waiting until the bird molts good feathers, why not imp and get the bird back into the wild quicker?

Wound Management—This workshop will reinforce techniques and materials covered in the wound management lecture (a required pre-requisite), giving participants the opportunity to gain hands-on experience with wounds on both mammalian and avian carcasses. A wide variety of wound assessment, cleaning, dressing and bandaging techniques will be discussed.

Basic Turtle Rehabilitation—Want to learn more about turtles? This hands-on workshop covers the entire rehabilitation process from admittance, physical examination, fluid therapy, assist feeding, shell repair and wound management.

Mammal Fracture Stabilization “Arts and Crafts”—Learn a variety of limb immobilization techniques for mammals big and small and practice your fracture palpation skills.

The Bugs in your Patient – Parasitology—The ability to detect internal parasites through fecal flotation and direct smears enhances your care of the wildlife patient. Participants will learn various techniques for identifying parasites in wildlife patients.

Avian Bandaging Techniques—Learn a variety of avian bandaging techniques for songbirds, raptors and waterbirds and learn when and how to apply these bandages to maximize success.

Introduction to Microscopy Open House—A microscope can be a tremendous resource to wildlife rehabilitators. Microscopes can be used to evaluate blood smears, to examine fecal samples for parasites, and to evaluate tissues and various types of fluid. Whether you’ve never used a microscope before or have years of experience, this Open House will teach microscope anatomy, tips for focusing at any objective, proper cleaning of a microscope and camera options for photographing your slides.

No pre-registration required.

Important: Workshop Lectures are open to all attendees with no preregistration required. If you are not able to attend the workshops, these lectures supply excellent information

- Adult Avian Critical Care
- Wound Management
- Basic Turtle Rehabilitation
- Mammal Fracture Stabilization—Arts and Crafts
- The Bugs in your Patient—Parasitology
- Avian Bandaging Techniques

Workshop Pre-registration

NWRA workshops are designed for an optimum learning experience through hands-on activities in small groups therefore limited enrollment is necessary. The pre-registration system for these workshops is outlined below.

1. **Register online by January 9, 2017** or mail in your paper registration form postmarked by January 9, 2017.
2. Watch your email the week of January 30, 2017 for a detailed program listing.
3. When you receive the 2017 program listing, read it carefully to plan your desired workshops. We recommend ranking your top three workshops for workshop early registration. Pay special attention to the date and time the online workshop pre-registration goes live, mark this date on your calendar so you don't miss it! **Workshop pre-registration is only available online.**
4. Register online- by following the link emailed specifically to you for workshop pre-registration. Only those individuals who are registered by January 9, 2017 may use this link to pre-register. **Payment for workshops is required at registration and requires a credit or debit card.**
5. Workshop pre-registration only is open for a limited time. Be sure you register within the designated time frame, **WORKSHOP SPACE IS FILLED ON A FIRST-COME, FIRST-SERVED BASIS.**
6. After pre-registration time has expired, you can register for workshops with available space online or at the symposium.

Please note: all workshop registrations are non-refundable and non-transferable.

Symposium Banquet

The **Friday evening** banquet provides a break from lectures and workshops and time to spend with friends before everyone returns home. Be sure to purchase your raffle tickets throughout the week to increase your winning odds on multiple items! Arrive early to view new Silent Auction items displayed and to finalize your choices and bidding plan. Enjoy the food, comradery and entertainment designed for you by this years amazing host committee!

Dinner is served at your table with tea, coffee, salad, bread, and desert.

CHOOSE ONE ENTRÉE

Parmesan crusted chicken
with herb roasted Yukon potatoes and petite carrots

~OR~

Salmon with herb roasted Yukon potatoes
and petite carrots

~OR~

Roasted vegetables with seared tofu,
house tomato jam and rice pilaf

INDICATE YOUR ENTRÉE CHOICE ON THE REGISTRATION FORM AND ENCLOSE \$43 PAYMENT WITH YOUR REGISTRATION FEE. IT IS IMPORTANT YOUR CHOICE IS KNOWN BEFORE THE SYMPOSIUM BEGINS. Only a limited number of banquet meal tickets are available for purchase at the Symposium.
