

NTEN is accepting applications for the Oregon Nonprofit Tech Readiness Program

It is a **free** program that offers a ton of great stuff including the following:

- Participation in NTEN's eight-week [Nonprofit Tech Academy](#) (NTA) course to gain baseline best practices for all aspects of technology management, from budgeting to planning to return on investment
- In-person trainings and hands-on workshops
- Resource-sharing and access to experts through regular online discussions, webinars, and phone calls through a private online group
- Access to share questions, ideas, and results with the nonprofit community at large through NTEN, MMT, and other partners
- Opportunity to continue learning by serving as a mentor or advisor with the next 6-month cohort

Not sure if this is a good fit for a newsletter or not but any way you can help share this opportunity with your community would be greatly appreciated. Here are a few links that help give a bit more context or things to link to in social posts.
