

Once president of the SAR, Dr. Reed Dunnick has been a visionary leader in radiology. To celebrate and commemorate his experiences, a 1-hour interview with him was filmed, covering a wide range of topics including the following four major content areas:
Radiology in general; Early Career Physicians; Organizational Strength; Leadership.

<http://goo.gl/xUodfb>

Dr. N. Reed Dunnick has been the chair of radiology at the University of Michigan for over 25 years and is an internationally respected broadly influential leader in our field.

He is a former president and gold medal recipient of the Society of Uroradiology (now the Society of Abdominal Radiology), and has served as president of countless radiology societies, including: Society of Body Computed Tomography and Magnetic Resonance, American Board of Radiology, American Roentgen Ray Society, Society of Chairs of Academic Radiology Departments, Academy for Radiology & Biomedical Imaging Research, Radiological Society of North America, and Association of University Radiologists (among others). His textbook on genitourinary radiology (now in the 6th edition) is an iconic treatise in the field of GU imaging.

In this one-hour interview, you will have the opportunity to learn from his lifetime of wisdom on departmental structure, early career success, organizational strength, and leadership.

The content is ideal for medical students considering radiology, residents and fellows learning their way, young faculty physicians planning their careers, future leaders aspiring to his heights, current and prospective chairs who want to emulate his successes, and anyone in or outside medicine who needs to know how an effective leader can sustain success for a long period of time.
