* Due to space limitations, residents and faculty registering at the discounted rates will only be admitted on a space-available basis. Registrations will be accepted in the order that they are received with priority given to ACOMS Members. Payments will be processed upon receipt and refunded if we are unable to accommodate the registration. A minimum of 60 days notice will be given to all resident and faculty registrants regarding space availability. OMS residents and full-time academic faculty can secure a guaranteed registration at the ACOMS member rate of $1,295.

Cancellation Policy for Conference Registration: Conference registration fees, less a cancellation fee of $250 (USD), will be refunded if written request is received before January 22, 2012. No refunds will be granted after January 22, 2012. All refunds will be processed after the meeting.
About the Course

It is the pleasure and privilege of the American College of Oral and Maxillofacial Surgeons to present the 2012 installment of The Hands-On Surgical Education Series: The ACOMS Rhinoplasty Hands-on Cadaver Workshop.

The course will feature a highly qualified oral and maxillofacial surgery faculty chosen for their expertise and experience in rhinoplasty and related procedures. The faculty will lead attendees from the initial rhinoplasty consultation to the management of the most difficult esthetic and reconstructive challenges. ACOMS is pleased to present this learning experience in the beautiful and culturally diverse city of New Orleans. The lecture and cadaver lab are held in the world-class facilities at the LSU Health Sciences Center.

This two day course will feature morning didactic lectures that are directed toward the surgeon with moderate to accomplished experience in rhinoplasty surgery. To allow the attendee a greater opportunity to transmit knowledge to actual patient application, the afternoon will feature a cadaver dissection lab where supervised hands-on tutorial is offered. This will allow practice of some of the concepts and techniques learned during the course.

At the conclusion of this course the participant should:

- Have a greater insight into pearls and pitfalls associated with the initial rhinoplasty consultation. Assessing and controlling patient expectations, pre-operative education, identifying and avoiding the unrealistic patient and coping with the dissatisfied patient post-operatively
- Appreciate nasal anatomy, physiology, and the relation of function to form in rhinoplasty surgery
- Understand the relationship between modification of the nasal skeleton and the impact on the nasal contour and function
- Gain knowledge of the approaches and techniques for a predictable and functioning rhinoplasty in the face of a variety of patient presentations: from the purely cosmetic patient to revision and reconstructive rhinoplasty

Our Faculty

Angelo Cuzalina, MD, DDS: Board certified private practice OMS and cosmetic surgeon, Tulsa Surgical Arts
Tirbod Fattahi, MD, DDS: Chief, Division of Oral and Maxillofacial Surgery; Program Director, Oral and Maxillofacial Surgery Residency, University of Florida College of Medicine
Jon Perenack, MD, DDS: Chair, 2012 Rhinoplasty Hands-on Cadaver Workshop; Assistant Professor and Director of Residency Training, Dept. of Oral and Maxillofacial Surgery, LSU Health Sciences Center, New Orleans
Faisal Quereshi, MD, DDS, FACS: Assistant Professor, Residency Program Director, Department of Oral and Maxillofacial Surgery, Case Western Reserve University School of Dental Medicine
