

Webinar: Utilizing CDC's 6|18 Initiative to Address High Blood Pressure

Tuesday, June 27, 2017
3:00–4:30 PM EDT

Webinar is free! Registration is required.
Available for 1.5 CME/MOC
acpm.org/618webinar

ACPM and the Centers for Disease Control and Prevention (CDC) are excited to present a webinar on Tuesday, June 27 to highlight the role of providers in CDC's 6|18 Initiative. The webinar will provide an overview of the initiative, a case study on controlling high blood pressure and an example of a preventive medicine physician participating in the initiative. In addition, you can learn about ACPM's current and future learning opportunities in health systems transformation—including the 6|18 Initiative.

This webinar is part of ACPM's Health Systems Transformation Project funded through a cooperative agreement between ACPM and CDC. Learn more at: acpm.org/hst

AGENDA OUTLINE

- Introduction and overview of ACPM's efforts in Health Systems Transformation (HST)
- Overview of CDC's 6|18 Initiative including providers' roles in various interventions
- Case study on controlling high blood pressure
- Role of preventive medicine physician in addressing the 6|18 Initiative
- Q and A
- Wrap Up: Future ACPM learning opportunities on the 6|18 Initiative

CDC'S 6|18 INITIATIVE

CDC is partnering with health care purchasers, payers, and providers to improve health and control health care costs. CDC provides these partners with rigorous evidence about high-burden health conditions and associated interventions to inform their decisions to have the greatest health and cost impact. This initiative offers proven interventions that prevent chronic and infectious diseases by increasing their coverage, access, utilization and quality. Additionally, it aligns evidence-based preventive practices with emerging value-based payment and delivery models.

CDC is targeting six common and costly health conditions—tobacco use, high blood pressure, healthcare-associated infections, asthma, unintended pregnancies, and diabetes—and, initially, 18 proven specific interventions that formed the starting point of discussions with purchasers, payers, and providers. The number of interventions may fluctuate over time.
