FDSOA, IN COOPERATION WITH FAMA, PRESENTS:

28TH ANNUAL APPARATUS SPECIFICATION & MAINTENANCE SYMPOSIUM

JANUARY 18-20, 2016

ABOUT THE CONFERENCE

FDSOA's Annual Apparatus Symposium is the only conference dedicated to providing a better understanding of fire apparatus and ambulances to the emergency services industry. Presentations from leading industry figures, as well as apparatus and equipment manufacturers, provide the attendee with a wide range of factual data. Breakout sessions and networking events provide a forum for sharing personal experiences with your peers. Last year's event had 350+ attendees. We expect even more this time! Please register now. Everyone is welcome to attend.

FDSOA's Annual Safety Forum immediately follows this Apparatus Symposium in Scottsdale, January 20-22. We've combined our two annual conferences into one event, offering a full week of training opportunities. Check out our website for details.
