Affiliated February 2015
Strategic Plan: 2016 forward

As a vertically integrated delivery system, Carle Health System continues to focus on improving the health of the people we serve by providing world-class, accessible care through an integrated delivery system

- **Consumer engagement** - create a transformational, innovative patient commitment between carle and the individuals it serves while engaging the consumer, physician and provider in collaborative care decisions
- **Data analytics** - create a nimble data analytics infrastructure to support the expanding informatics needs

- **High quality care models** - create best practices, distinguished approaches and care coordination to manage identified primary care and specialty needs while creating an effective medical management infrastructure for functional and strategic alignment of the providers and the health plan.
- **Focus on the people** - recruit, retain and develop talent with contemporary competencies and skill sets
- **Provider, payor & community partnerships** - establish, maintain, and grow select partnerships to create a high performing network of care and expand the quality of care to a broader geography
- **Financial sustainability** - ensure a financially stable and community focused Carle Health System
State-of-the-art services

Carle is continuously working to bring the best to east central Illinois.

Our accreditations and advanced care centers include:

- Level I Trauma Center
- Level III Perinatal Services

Education & research

Carle clinicians are advancing care through medical research and teaching future physicians.

**Education and research programs:**

- Collaborative opportunities with the University of Illinois Beckman Institute for translational research work
- Primary teaching hospital for the University of Illinois College of Medicine
- Residency programs in internal medicine, oral and maxillofacial surgery and general surgery
- Area destination for continuing medical education
- More than 350 clinical research studies
- Carle Tissue Procurement Services to provide scientists with reliable access to tissue samples
Education & research

Carle Illinois College of Medicine is the first college of medicine designed at the intersection of medicine and engineering.

Goals of the College of Medicine

- Reinvent health care around revolutionary advances in engineering and technology to further research, education and clinical care delivery
- Transform health care education of physicians
At Carle, our focus is on providing the highest quality care to patients while also providing tangible benefits to the community.

Community benefit is central to Carle’s long term goals, because we understand that supporting our neighbors in need makes the community a better place for everyone. In 2014, Carle provided $118.8 million in services, donations and support to our community, which included $38.9 million in free or discounted care to more than 31,000 patients.

A report of Carle Foundation Hospital’s community benefits provided in 2014 has been filed with the Illinois Office of the Attorney General, a requirement for not-for-profit hospitals. See the summary of community benefits and infographic.
Philanthropy

Carle was founded on philanthropy, when Margaret Burt Carle Morris gave a generous donation in 1918 that started the health system we know today.

Since then, thousands of donors have contributed to hundreds of projects that go the extra mile for our patients. Donations from friends like you have helped build better facilities, provide better equipment, and fund education and research. Each year, more than 800 volunteers give more than 130,000 hours to Carle - from our entryways to our clinics and our hospital floors. And we have a strong vision to ensure that countless families enjoy more of the moments that matter.
