Kim Stanfill-McMillan Fired Up Pottery Madison, WI

Thanks for voting me to the board. I am super excited for this opportunity, and I'm ready to give back to CCSA after benefitting from my membership for years. I am from Wisconsin for the last 24 years, but originally I am from Maine and Massachusetts. I have owned my studio for 11 years, and started it from scratch. I was married for over 30 years, and now I am currently living on my own. I have three kids, Margie aged 17, and going into her senior year in High School, and Terry my 19 year studying architecture, and Alex aged 21 who lives in Sothern California (Bio written in 2016).

I am on chat all the time, but each day I learn something new that makes me a better studio owner... Before becoming a studio owner, I worked in many fields, such as Forestry for Baxter State park in Maine, structural engineering in private practice, erosion and sedimentation control for the state of Maine, a timber bridge engineer for the US Forest Service, and of course I have worked for myself. Please feel free to call or email me if you ever need anything or have questions. I love helping other studio owners.
