1 A firm is listed here if it provides assay of radionuclides at low specific activity in diverse materials, participates in national proficiency tests and will accept work from private firms.

2 Sludge from drinking water treatment or sewage.

3 Naturally Occurring Radioactive Materialm (NORM) is evaluated under QA/QC, as are byproduct radioisotopes.

4 The facility can deal with samples that are substantially more radioactive than background, at least in emergencies.

5 The firm performs the toxicity chacteristic leaching procedure required by EPA for wastes to be disposed of, e.g. at Envirocare or Richland.

6 The firm will provide packaging for samples and instructions on packaging.

7 Response time is the typical value from receipt of sample to report of analysis by the firm; most firms will expedite sample analysis for an additional fee.

8 Proficiency test programs: Commercial services such as Analytics or Environmental Resource Assoc.; DOE/ORNL Consolidated Audit Program (DOECAP);

DOE/RESL Mixed Analyte Performance Evaluation Program(MAPEP); National Environmental Laboratory Accreditation Conference (NELAC).

Customers should request copies of performance Repts. and NELAC Certif.
