#### **House Passes ACA Replacement Measure**

Earlier today, by a 217-213 vote, the House passed a measure to repeal and replace significant portions of the Affordable Care Act.

The measure now moves to the Senate where the bill's prospects are uncertain.

Key provisions of the House bill include:

- eliminating tax penalties for people without health coverage
- rolling back state-by-state expansions of Medicaid
- Offering tax credits of \$2,000 to \$4,000 a year (a family could receive up to \$14,000 a year in credits. Credits would be reduced for individuals making over \$75,000 a year and families making over \$150,000)
