Brownie's is back and better than before Irma

Pompano Beach, FL., October 10, 2017 - Brownie's Marine Group, Inc. – After nearly two weeks of having both Florida offices and the factory closed, Brownie's Marine Group is back to business, but not as usual. In fact, the operations at Brownie's have revved up as preparation for DEMA Show 2017 and the launch of a new venture as L&W Compressors newest distributor consume the Brownie's team.

Brownie's Marine Group and German-based company L&W Compressors, manufacturers of high pressure compressors, came to an agreement and contracts were signed on August 7, 2017. Hurricane Irma hysteria, preparation and aftermath may have slowed movement, but it certainly did not halt it. LW Americas was created and quickly got to work on its first sale and installation of two high pressure compressors (LW 320 MC) aboard the 134 foot research vessel, the M/Y Sharkwater.

In order to meet the demanding capacity necessary to conduct the wide span of research, LW Americas installed two LW 320 MC models which support the NitroxMaker™ NM-10 CS, all controlled from a Yacht Pro 4x4 Panel. This premiere installation will support underwater research conducted from the ship for years to come.

Brownie's Marine Group doing business as LW Americas, is excited to contribute to the exploration and conservation of our oceans. LW Americas is actively seeking distributors, resellers, and technicians in all regions to join their team. Contact LW Americas at info@lwamericas.com for additional information. For more information visit: <https://LWamericas.com>.
