

Tank Rum - - Yes, We Are Open!

Dive Businesses in Areas Impacted by Hurricanes

11OCT2017 - **Florida** - Tank Rum, warehoused in Florida, is now 100% operational, shipping to all USA and Caribbean marketplaces. Though Tank Rum is inventoried in warehouses around the world, all of the Tank Rum headed into the United States and most of the Caribbean is stored in Florida within a Duty Free zone.

“We were most worried about our Tank Rum product line being hit by the recent hurricanes,” said Brooke Boak, President. “And though our inventories were not directly effected, many of our customers [stores, restaurants, bars, and resorts] throughout the region have been seriously set-back. The only effects we have seen on our TankH2O line of business have been shipping delays for products traversing across the southern portions of the United States.”

Tank Rum is a product from Drink Tank Ltd., a company built by, and for, scuba divers, outdoor adventurers, and water sports enthusiasts. Tank Rum was launched in 2017 at industry leading tradeshows, including **IAADFS** (Duty Free) and **WSWA** (USA Wholesalers). Tank Rum has already captured the attention of tropical-bound and tropical-minded ocean vacation travelers and is now available worldwide in all of these places.

The gorgeous super-flint glass Tank Rum bottle is at the top of every scuba diver's gift-list and will be sure to well-represent their vacation, where rum is the drink-of-choice amongst the tropical regions due to rum's sugar-cane origin. The “Platinum” rum is distilled on Réunion Island, a French territory in the heart of the Indian Ocean, thus the

bottles are proudly marked, “Product of France”. Like the pristine environment where Tank Rum was born, the distinctive rum inside keeps consumers coming back for more to fuel their desire for Tank Rum-based cocktails famous in the tropics: Mai Tai's, Mojito's, Piña Colada's, Daiquiri's, “Scuba Libré's”™ (Rum & Cola), Tank Rum & Red Bull, etc. 750mL. 80-Proof.

TankH2O Tank Rum follows the success of the company's stainless-steel flask, TankH2O, the dive industry's “Product of the Year” for three (3) years in a row and the top-selling dive water bottle, world-wide. The distinct bright-yellow TankH2O bottle doubles as a flask and allows people to show off their love of scuba diving to any/all who are within eye-sight.

Tank Rum and **TankH2O** make great gifts for fellow scuba divers and ocean adventurers.
