Florida Residency Conference Excellence in Research Awards

The Pharmacy Residency Excellence in Research Awards program was created with the intent of recognizing pharmacy residents for their innovative contribution of original research relevant to health-system pharmacy practice during the calendar year preceding the Florida Residency Conference.

This awards program will honor ONE PGY-1 and ONE PGY-2 resident annually at the Florida Residency Conference.

Award Eligibility
PGY-1 and PGY-2 residents presenting their current research project results at FRC.

Description of Award:
The recipient of this award receives a $250 honorarium and a plaque.

Selection Process
All application materials must be completed and received in full by the deadline date posted on the FRC website. A blinded review panel will be selected by members of the FRC Steering Committee and the FSHP Research & Education Foundation Board of Directors. The review panel will select finalists for the award using the selection criteria listed below.

Selection Criteria:
The research should focus on the advancement of pharmacy practice and be conducted by a pharmacy resident in an ASHP-accredited residency program or a pharmacy resident in a residency program that has submitted an application for ASHP accreditation.

Preference will be given to research projects with the potential to yield strong scientific evidence that can be used to advance pharmacy services. Criteria will take into consideration:

- The research has specific aims and purpose
- The research has measurable objectives that relate to practice-based research focusing on the advancement of pharmacy practice.
- Interdisciplinary collaboration is evident
- The concept and research design are well thought out to provide meaningful data
- Rigorous research methods that support the study objectives are used
- Appropriate statistical analysis and interpretation of data
- A description of the impact the results of the project have had or will have on advancing pharmacy services
- A description of the potential to generalize findings to other health care facilities.
- Includes both strengths and limitations of study and addresses alternative methods or areas in which study may be more beneficial as appropriate
- Presentation at FRC that is organized and free of errors
- Presentation is given with appropriate style, tone, volume and pace
- Resident presents materials with confidence, responds to questions and elaborates on presentation as appropriate

The selection panel has the option to select up to five finalists for the award and the final presentation of the research project at FRC will be included in determining the award recipients.
