Home Health Section Research Grant Program
The Home Health Section funds pilot research in the home care clinical setting. The purpose of this grant program is to encourage the process of data collection and care practice investigation, thereby enhancing opportunities for evidence-based practice by Section members. Moreover, the program is intended to develop viable pilot studies, ultimately serving as the foundation for larger investigations with industry-wide implication.

Application Deadline: June 7, 2013

Details available from the Home Health Section website:
