S. 772

“Traditional Cigar Manufacturing and Small Business Jobs Preservation Act of 2013”

In 2009, “The Family Smoking Prevention and Tobacco Control Act” was signed into law with the intent of curbing youth access to tobacco products and preventing health effects of addiction to tobacco products. Premium cigars fit neither area, yet are facing undue regulation from the Food and Drug Administration (FDA) and the Center for Tobacco Products (CTP).

We are expecting the FDA to issue proposed regulations on premium cigars in early 2013. Restrictions that our industry could face include: a ban on walk-in humidors, essentially destroying the cigar buying experience for consumers; requiring FDA approval on seasonal and historical blends/lines, several of which are produced in limited supply; a ban on sampling and merchandise, tools used by manufacturers to promote new products at in-store visits; and mandating the installation of graphic labels, ruining ornate artisan boxes that many consider collectable art pieces.

S. 772 protects the premium cigar retailer and its consumers, which account for over 85,000 domestic jobs. We urge you to co-sponsor this legislation and help to preserve a freedom enjoyed by adults for centuries in the United States. Premium cigars are not accessible, desirable, or affordable to America’s youth. Premium cigar smoking is not addictive. Cigars are a celebratory product appreciated by informed adults, with the typical cigar enthusiast having one or two per week.

Although there are over 13.3 BILLION cigars sold annually, this bill was carefully written to only protect true, premium cigars of which there are about 275-300 MILLION sold annually. The legislation defines a premium cigar as wrapped in whole 100% leaf tobacco, at least 6 pounds per 1,000 count, with no filters or tips. Additional language in S. 772 incorporates hand-made elements that define traditional premium cigars that are made in historic factories by skilled workers.

During the 112th Congress, a similar bill was introduced by Sens. Nelson and Rubio. During that time, it garnered 12 co-sponsors. With your help, we’ll raise greater awareness during the 113th.

IPCPR Position

IPCPR supports S. 772 and we encourage Senators to co-sponsor and vote in favor of this legislation. This bill will help to preserve an artisan industry, accounting for over 85,000 jobs in the United States. Premium cigars should not be regulated by the FDA.
