27th International Conference on Antiviral Research (ICAR)

Raleigh
North Carolina USA
MAY 12 – MAY 16, 2014
The 27th International Conference on Antiviral Research (ICAR), hosted by the International Society for Antiviral Research (ISAR), will take place at the Raleigh Convention Center, Raleigh, NC, USA. The conference will begin on Monday, May 12th, 2014, and will conclude on Friday, May 16th, 2014.

ICAR provides an interdisciplinary forum of interest to chemists, biologists, and clinicians involved in antiviral research. At ICAR, scientists worldwide working in the areas of basic, applied, and clinical research meet in a collaborative and collegial atmosphere to review recent developments in all areas of antiviral drug discovery and development. Specific topics to be covered in the scientific program include: medicinal chemistry, virus replication, host cell-virus interactions, virus latency, new target identification, biochemistry and mechanism of action, mechanisms of viral drug resistance, assay development, in vitro evaluation, animal models, pharmacokinetics, toxicology, and clinical trials. Within these areas of interest, there will be keynote, plenary, and overview speakers, single topic minisymposia, a clinical symposium, and oral and poster presentations.

The first thing many visitors say about Raleigh is, “It’s so green here.” Well, that phrase takes on a whole new meaning with the area’s renewed commitment to sustainability. From the Raleigh Convention Center, one of only two Silver LEED Certified centers in the country, to the world-class universities and companies here seeking environmentally-friendly breakthroughs. Raleigh has it all and makes it an ideal location for the 27th ICAR.
