An Update on Published Physical Therapy Case Reports & Selected Topics Relevant to Current Management of the Spine

This seminar is the presentation of various case reports and other scientific literature relating to the evaluation and intervention of patients with spinal dysfunction. Through the review and presentation of the literature, attendees will learn about current evidence supporting innovative patient/client management for this common patient problem. This forum provides an excellent opportunity for clinicians to analyze and apply research findings to their current physical therapy practice.

PRESENTATIONS:
Case Reports & Literature related to the Spine will be presented by graduate physical therapy students enrolled in the DPT Program at Bellarmine University.

CLINICAL EDUCATION CREDIT
Kentucky Physical Therapy Association (KPTA) has approved 9.5 contact hours of continuing education credit to those who attend both sessions of presentations. 4.75 contact hours may be granted for those only able to attend one session.
