Blue Cross and Blue Shield of Louisiana has proudly served our state for nearly 80 years. While the healthcare landscape has changed, our dedication to improving the health and lives of Louisianans remains the same.

We couldn’t do this without collaboration from the doctors, clinics and hospitals in our network. Together, we’ve developed innovative programs that keep healthcare costs in line and get better results for patients.

This creates a quality, affordable healthcare system that will be here for years to come.

We look forward to working with the Louisiana Hospital Association and our other partners around the state in creating a healthier future.

For over thirty-five years, hospitals have turned to the specialized programs provided by the Louisiana Hospital Association (LHA) Trust Funds and HSLI. Just as healthcare constantly changes, so must each hospital’s insurance coverage. That is why the LHA Funds offer flexible options that are designed for today’s healthcare facilities. Through programs managed by a board made up of hospital administrators, the stable, secure LHA Funds guarantee real value when it comes to providing Hospital Professional Liability, Physicians Professional Liability, General Liability, and Worker’s Compensation Coverage.

The LHA sincerely appreciates CEO/Administrator support for individual hospital participation in the Hospital Preparedness Program.

This year’s grant goals, now called Capability Planning Guides (CPGs), continue with reliance upon the regional infrastructure and the roles of the Designated Regional Coordinators (DRC) and the Designated Regional Hospitals (DRH) across the state. Individual hospital participation in HHS activities will continue to be crucial as hospitals increase their surge capacity to prepare for not just a pandemic flu event but for all hazards events.

The ultimate goal of the Hospital Preparedness Program is to improve hospitals’ emergency preparedness and response capabilities. While it is recognized that issues such as hospital size, type, and location impact emergency response capabilities, all hospitals are valuable in these planning efforts.
