

Combination Label Order Form

Please allow two weeks to receive your labels from the time we receive your order.

NOTE: NAFED's Combo Label can be used for hydrotesting or for six-year maintenance requirements. It meets the size mandated by NFPA 10. However, last year the DOT issued a written notification stating that simply including a company's RIN, "S," and punching out the month and year of service on Combo Labels or Hydrotest Labels was NOT in compliance with their regulations; this Combo Label does NOT meet regulations for DOT specification cylinders being used as fire extinguishers by companies that hold a RIN. To avoid confusion, NAFED has stopped including RIN and "S" on Combo Labels and Hydrotest Labels. There are two options: use another label that is in compliance, or write to the DOT and ask for a variance from their requirements. Using NAFED's new DOT Hydrotest Label (which includes the letter "S", a company's RIN, and space to write the month and year of the test) will bring you into compliance with the DOT's requirement. Visit www.nafed.org/products to download an order form for NAFED's DOT Hydrotest Label, or call (312) 461-9600 to have one faxed to you. **NOTE:** In order to be compliant with DOT and NFPA 10 requirements, a DOT Hydrotest Label needs to be applied in addition to a standard NFPA 10-style Hydrotest Label or Combo Label.
