

SATURDAY, SEPTEMBER 30 & SUNDAY, OCTOBER 1

PRESENTER: Dr. Kristina Petrocco-Napuli

"Chiropractic Care for Women's Wellness"

- 9:00am - 12:00pm & 2:30pm - 6:30pm (7 Hours of CEU on Saturday)
- 8:00 am - 12:00pm (4 Hours of CEU on Sunday)

Outline:

It is widely known that females tend to seek chiropractic care more frequently than males. There are many complaints that are unique to females which correlate to the life phase. In addition to internal physiological factors, there are many external and societal factors that can contribute to our patients' conditions. During this course Dr. Petrocco-Napuli will discuss common conditions seen in chiropractic practices which are specific to the female population as well as the biomechanics, societal influences and special populations.

Objectives:

1. Discuss the pathophysiology associated with pain and the impact on the female population.
2. Recognize the most common conditions which present in chiropractic practices and discuss assessment and treatment options.
3. Correlate clinical judgment and presenting conditions to assist in developing quality patient care treatment plans.
4. Demonstrate various assessment and treatment options, including orthotics, for conditions associated with the female patient.
5. Discuss patient centered and integrative models of care surrounding female patients.

About Dr. Kristina Petrocco-Napuli DC, MS, FICC

Kristina Petrocco-Napuli is an expert in women's health, pediatrics, chronic pain and integrative care and is frequently sought after as a national speaker. Currently an associate professor of chiropractic clinical sciences at National University of Health Sciences-Florida, Dr. Petrocco-Napuli received her doctor of Chiropractic degree from New York Chiropractic College; following graduation she entered into

a postdoctoral fellowship program within Chiropractic technique. She also received a master's degree in instructional design development and evaluation from Syracuse University.
