FRIDAY, MARCH 24TH

"INTRODUCTION TO THE IDENTIFICATION, ASSESSMENT, AND CHIROPRACTIC TREATMENT OF POST-CONCUSSION SYNDROME"

PRESENTER: DR. MATTHEW M. ANTONUCCI

TIME: 12:00 PM – 6:00 PM

OUTLINE:

NC BOE CLASS:6 HOURS OF CEU

Over the past 5 years, chiropractic has come into the limelight as a consequence of helping numerous professional athletes recover from career-ending concussions, without surgery or medications. With this newfound notoriety, the public is now seeking out chiropractors that understand concussion and how to fix it; in-fact, new legislations also allow chiropractors trained in concussion to certify return-to-play for post-concussion athletes. This course has been specifically designed to solidify foundational concepts, symptoms, the neurophysiology, the areas of the brain that are most commonly affected by concussion, and how to test for them. Even if you don't work with athletes, many people don't realize that one of the largest causes of concussion is a motor vehicle collision. It has been estimated that 1 in every 2 people will have a concussion at some point in their life. How many people walk through your clinic's doors?

ABOUT MATTHEW M. ANTONUCCI, DC, DACNB, FACFN, FABDD, FABNN, FABVR, FABBIR, FICC

While in graduate school, Dr. Antonucci became fascinated with the nervous system, particularly the brain of humankind. After receiving his doctorate in chiropractic medicine, he became a board-certified diplomate in the sub-specialty of chiropractic neurology. While completing a fellowship in functional neurology, Dr. Antonucci completed a 2-year neurology residency under Professor Fredrick R. Carrick, training in the rehabilitation of complex neurological conditions. Dr. Antonucci continued to engage in the advancement of his knowledge through completing 1-year fellowships in each of the following: childhood developmental disorders, vestibular rehabilitation, neurochemistry and nutrition, as well as a 2-year fellowship in traumatic brain injury rehabilitation. In 2015, he was bestowed the highest honor in the chiropractic profession: a lifetime fellowship into the International College of Chiropractic. Dr. Antonucci finds interest in educating healthcare providers, treating childhood developmental disorders, movement disorders, degenerative conditions, brain injuries, sports and neurological performance enhancement, and conducting clinical research. Dr. Antonucci is currently the Vice President of the American Board of Brain Injury Rehabilitation, the Vice President of the ACA's Council on Neurology, a Review Editor for the peer reviewed medical journal "Frontiers in Neuroscience", an Associate Professor of Clinical Neuroscience for the Carrick Institute, Director of Curriculum Development for the Carrick Institute, and the Director of Neurological Performance and Rehabilitation for Plasticity Brain Centers, and NeuroSynergy Associates, where he currently attends patients.

"OPTIMIZING MUSCULOSKELETAL HEALTH: PROTOCOLS FOR PERFORMANCE AND RECOVERY"

PRESENTER: DR.ROBERT SILVERMAN

TIME: 12:00 PM – 6:00 PM

OUTLINE:

6 HOURS OF CEU

Join Dr. Silverman as he explores the process of implementing musculoskeletal laser protocols into your practice. He will share in-office tools, laser protocols, nutrition protocols, and proven rehab programs. In this exciting presentation, you will gain insight into a simple methodology to incorporate these protocols into a clinically effective system. This seminar is ideal for any practitioner who wants to get the musculoskeletal edge in their community. Learn science based clinical protocols for the management of various symptoms and conditions. Attendees will receive clinical

COURSE TOPICS & INFORMATION

protocols and pearls based on case studies, an up-to-date syllabus with graphics and take home notes, and information-packed day guaranteed to expand your clinical knowledge.

ABOUT ROBERT G. SILVERMAN, DC, DACBN, DCBCN, MS, CCN, CNS, CSCS, CIISN, CKTP, CES, HKC, SASTM
