Education Session: Vibrant Leadership: The Art of Transcendent Leadership with Nicole Greer
Everyone is a leader. Period. Getting conscious and taking action to address this question, "What is it like to experience me?" ...creates a transcendent leader. *Transcendent Leadership has been defined as, the demonstrated capacity of an individual to influence others to rise above self-interest and social conformity to create a climate of shared governance that benefits the greater mission.* In this 90-minute session Nicole will explore the principles of transcendent leadership. Attendees will learn and experience through a collaborative coaching™ process, the following: • Gain a consciousness about today's environment and adopt the proper mental models for performance. • Get a Grip on what true innovation is and what kinds of behavior make it possible. • Gear up your virtue, glean insights into your personal character development and grow the integrity in your organization at the same time. • Grasp the concept of social capital and how to use John Kotter's Change Model to engage associates to do more together. • Gather insights into how to achieve these results
