SCHEDULE OF EVENTS FOR ANNUAL MEETING 1983

AMERICANA CONGRESS HOTEL
Chicago, Illinois
Oct. 29 - Nov. 2

SATURDAY October 29
8:00 am - 12:00 pm Board of Certification meeting
1:00 pm - 7:00 pm Board of Directors meeting
4:00 pm - 7:00 pm Registration desk open

SUNDAY October 30
7:00 am - 6:00 pm Instructors' Room available
7:30 am - 6:00 pm Registration desk open
9:00 am - 5:30 pm Educational Courses
7:30 pm - 9:00 pm Reception
9:00 pm - 7:00 pm Dance

MONDAY October 31
7:00 am - 6:00 pm Instructors' Room available
8:00 am - 2:30 pm Registration desk open
9:00 am - 12:30 pm Workshops
1:30 pm - 5:00 pm Workshops

TUESDAY November 1
7:00 am - 12:30 pm Instructors' Room available
7:30 am - 1:30 pm Registration desk open
8:00 am - 12:00 pm Scientific Session
1:30 pm - 7:00 pm Business Meeting
6:30 pm - 9:00 pm Banquet

WEDNESDAY November 2
7:00 am - 12:00 pm Instructors' Room available
8:30 am - 11:30 am Instrumentation Session
1:00 pm - 7:00 pm Board of Directors meeting
SUPPORT GROUP MEMBERS

I am very pleased to list the following OPS members who have volunteered to work in the Support Group for the 1983 annual meeting:

Denice Bartlett, C.R.A., C.O.T.
Eleanor Mauer Evans
Chris Howitt
Debbie Runnels
Dennis Swenson, C.R.A.
Gerard Tetreault
Jennifer Williamson, C.O.T.

As mentioned in the last Newsletter, those of you who wish to participate in this very worthwhile group, assisting with detail work associated with the Educational Courses and Workshops, please contact me as soon as possible. Your participation and work assignments must be confirmed prior to the published meeting schedule. If interested, send me your name, hotel where you are staying, arrival date and phone number where you may be reached prior to the meeting. Contact:

John L. Johnson, F.O.P.S.
Technical Director, Ophthalmic Services
William Beaumont Hospital
3601 W. 13 Mile Rd.
Royal Oak, Michigan 48072
(313) 288-7131

CALL FOR PAPERS

It's time to again to put out a call for instrumentation seminar papers for the OPS Meeting this fall. Even though it seems like there's plenty of time to prepare, November will be here before we know it.

The purpose of this letter is two fold. First to review the purpose of the Instrumentation seminar, then to share some thoughts on presentation of papers. Historically the Instrumentation seminar has been an occasion for members of the O.P.S. to get together and share improvements to equipment or different techniques that they have found helpful. These "Tidbits" can include almost anything from cameras to film, video to filing systems, anything that helps to make the quality of our work better, or our jobs easier.
CALL FOR PAPERS continued...

Unlike the Scientific session presentations, papers for the Instrumentation seminar should be fairly brief: five minutes should be plenty of time to mention a new fixation light and fifteen minutes should cover a video set-up for the operating room. I will encourage questions from the floor after each talk because discussion of a topic can be as informative as the talk itself. Another difference between the Instrumentation and Scientific sessions is that time will be allotted for papers from the floor. This will allow someone to present their ideas even though they are not on the published agenda. Time will be limited for these "add-on" papers, so please try to let me know by August if you intend to present an Instrumentation paper.

Now as to the presentation of papers in Chicago. Each speaker will be given a certain amount of time for his or her paper. Generally the time allowed will be between five and twenty minutes. It will help if you have some idea how much time you need when I receive your synopsis. I would also like to have a short outline of each paper for the published program so that people attending the O.P.S. meeting will have some knowledge of topics to be covered.

I will be happy to assist you in preparing these brief outlines, if need be. This outline, in expanded from, can also be a help to the speaker so that all points of the paper will be covered.
Visual aids, especially 35mm. slides, will be very helpful in getting your message across. People at meetings find it much easier to understand the modification of a framiostat if you can show them a picture of one, preferably before and after. Also keep in mind that the slides should be well exposed; low key or under exposed slides are simply lost in the ambient light in most conference rooms. Selected text slides can be of assistance to re-inforce what you're saying. Please don't tread them. There are many methods of creating textslides and most of these are covered in the kodak book.

If you have any questions concerning visual aids, give me a call and I'll try to steer you in the right direction. In the past, the Instrumentation Session has been the first opportunity for members to speak at the National meeting of the O.P.S. I would like to encourage new or old members who haven't yet given a paper at an O.P.S. meeting to give it a try this November. The first time is always the hardest.

I hope to hear from many of you soon, and I look forward to a very interesting three hours on November 2, 1983 in Chicago.

Dennis Thayer
Director Medical Photography
Jules Stein Eye Institute
U.C.L.A. School of Medicine
800 Westwood Plaza
Los Angeles, Calif. 90024 (213)206-6300
I have spoken to many ophthalmic photographers who have had wonderful ideas for a presentation in the Scientific Session but so few have come forward and offered their time and energy. Please give some serious consideration to giving a short 10 minute lecture on a topic which you have special interest. I want to encourage new members and those who have not previously presented material to share your ideas with the OPS membership. If you are interested, please contact me.

Dennis J. Makes, C.R.A.
Lecturer in Ophthalmology
University of California-Davis
4301 X Street, Room 251
Sacramento, CA 95817

(916) 453-5200 or
453-2464

There has been a profusion of new equipment made available to the field of ophthalmic photography in just the past 24 months. Retinal cameras, specular microscopes, video systems, and photo slitlamps are now available from many manufacturers. New films are ours to use from Kodak, Polaroid, 3M, and Fuji this year. Ophthalmic photographer's who are involved with this wave of new technology will have the ideal opportunity to share and compare by attending and presenting at the 1983 Ophthalmic Photographers' Society meeting in Chicago Oct. 30 -Nov. 4. Contact Dennis Makes, Dennis Thayer or myself, prior to July 15 if at all possible.

William Ludwick, C.O.T., F.O.P.S.
2312 Roark Drive
Alhambra, CA 91803
1983 O.P.S EXHIBIT ENTRIES...

REMINDER

Entries for the 1983 O.P.S. Print and Stereo Slide exhibit at the American Academy of Ophthalmology in Chicago will be accepted until September 6, 1983. Submissions may be made by dues paid O.P.S. members.

If you have not received your entry kit with the rules and print identification labels, contact Mr. Martin F. Chrobak.

If you have questions regarding stereo slide submissions, please contact Mr. Kenneth G. Julian,

Mr. Kenneth G. Julian  
Department of Ophthalmology  
Indiana University  
School of Medicine  
702 Rotary Circle  
Indianapolis, Indiana  
Room 323  
46223  

Phone  (317) 264-2487

If you have questions regarding print submissions, or you have not received your entry kit, please contact Mr. Martin F. Chrobak.

Mr. Martin F. Chrobak

Phone  (312) 649-8156

We look forward to your entries.

REMEMBER: ENTRIES MUST BE RECEIVED NO LATER THAN SEPTEMBER 6, 1983.
HOUSING INFORMATION FOR ANNUAL MEETING

Hotel reservations for the 1983 American Academy of Ophthalmology and the Ophthalmic Photographers' Society meetings may be made by writing the following:

AAO HOUSING BUREAU
C/O CHICAGO CONVENTION AND TOURISM BUREAU
McCORMICK PLACE-ON-THE-LAKE
CHICAGO, ILLINOIS 60616

The schedule below represents the 1983 AAO meeting.

Daily Schedule

Instruction courses will be offered Monday afternoon through Thursday. The Film/Video Program will be presented daily.

Sunday, October 30, 1983

8:00 AM  Registration Opens
9:00 AM  Technical Exhibits/Academy Resource Center/Scientific Exhibits & Posters Open
7:00 —   Scientific Sessions
10:00 PM

Monday, October 31, 1983

8:00 AM  Registration Opens
9:00 AM  Opening Session
9:30 AM  Jackson Memorial Lecture — G. Richard O’Connor, M.D.
10:10 AM  Scientific Session
2:00 —   Scientific Sessions
4:00 PM
4:30 PM  Annual Business Meeting
6:30 —   President’s Reception
8:30 PM

Tuesday, November 1, 1983

8:00 AM  Registration Opens
9:00 —   Scientific Sessions
12:00 Noon
2:00 —   Scientific Sessions
5:00 PM
Evening   Alumni Functions

Wednesday, November 2, 1983

8:00 AM  Registration Opens
9:00 —   Scientific Sessions
12:00 Noon
2:00 —   Scientific Sessions
5:00 PM   Evening   Alumni Functions

Thursday, November 3, 1983

8:00 AM  Registration Opens
9:00 —   Scientific Sessions
12:00 Noon
2:00 —   Scientific Sessions
5:00 PM   Meeting Closes
MEETING HOTELS...location numbers did not photocopy, unfortunately.

Housing Information

Detach and send the housing form below to:
AAO Housing Bureau
c/o Chicago Convention & Tourism Bureau
McCormick Place-on-the-Lake
Chicago, Illinois 60616

DO NOT SEND FORM TO THE ACADEMY

You will receive confirmation from the assigned hotel, along with any request for deposit. Changes in arrival/departure date or room type should be made directly with the hotel. Cancellations should be made in writing to the Housing Bureau.

The Housing Bureau will accept telephone requests for housing only after October 17th, after which time there will be no reservation confirmations sent.

John L. Johnson
Editor, O.P.S. Newsletter

Dear John:

As a C.R.A., I am responsible for the integrity of the filters I use for fluorescein angiography. In the past, when my fluorescein angiograms would become dense and low contrast, I would look at the barrier filter. Seeing a ring of lighter color near the edge meant that it was time to order new filters. The last filter trouble I had was with the exciter. It changed color from blue-green to a more pure blue. This was difficult to diagnose because the exciter filter is deep inside the fundus camera.

As I installed the new filters, I decided to devise a way to test them more scientifically (and more routinely) than before. I have done that and would like to share it with you.

Usually, at the start of each fluorescein angiogram, I make a filter overlap picture on one frame. The Zeiss camera is set at viewing level 3 (of 4), flash IV (360 w.s.), high minus range and green illumination. Then, I put my 1/4 inch plate glass, second surface mirror (which is about 4x4 inches and is an invaluable copy photography aid*) up to the objective lens. It rests against the end of the barrel, and I focus on the viewing lamp filament, then switch to the exciter filter and snap a picture. In the negative, it looks like a small overexposed circle of light with a few tiny lines and gray areas. This is not important. The important part is that this will appear on every fluorescein angiogram from now on. If this standard filter overlap picture changes, watch out!

Well, want to know the color of the overlap? I tried it on Kodachrome 25. It's green! I get a very dim green circle using my highest flash setting (360 w.s.)

Of course, I expect photographers using other fundus cameras to adapt this technique to their equipment. This is to be encouraged.

These filter overlap pictures will be available in November. Anyone who questions the integrity of their angiographic filters should make a similar filter overlap picture to bring to the O.P.S. meeting to compare against mine and others.

Since these filters must be replaced in pairs, I have no data concerning evaluation of the filters singly. I have taken color slides of my new filters separately using my lowest flash setting (50 w.s.). If the overlap changes, I can repeat these and maybe tell which filter is different.

*William Nyberg gets the credit for this. Put the mirror face up on the copy work. Focus the lens on its own front element. Adjust the camera to center the lens. The film is now parallel to the copy work!

Sincerely yours,

[Signature]

JOFS  JAPANESE OPHTHALMIC PHOTOGRAPHER'S SOCIETY

Sadao Kanagami, JOFS,
3-14-10 Hayamiya
Nerima-ku Tokyo, 176
JAPAN

June 15, 1983

John L. Johnson, JOFS,
Editor, Ophthalmic Photographers' Society Inc.
Technical Director
Ophthalmic Service
3601 W. 13 Mile Road
Royal Oak, MI 48072 U. S. A.

Dear John:

We had held the 1st ophthalmic photography exhibit in Kyoto at the 87th Japanese Academy of Ophthalmology meeting which held through 19th to 22nd of May 1983. 180 photographs exhibited in 4 categories, they were color fundus, fluorescein angiography, slitlamp and anterior segment and miscellaneous photographs. Many collaborators came through the meeting and the exhibit became the center of their interest. Awards were given first to third in each category with extra prize.

One more topic is a publication of our Journal. It published May 1983 named Japanese Ophthalmic Photographic Magazine. It will be published twice a year.

JOFS is planning the Ophthalmic Photographic Seminar and Workshop in next September 17th and 18th, during Japanese Academy of Clinical Ophthalmology week.

Our society is growing up this year because we called to become new members thru ophthalmic journals. We have more than 50 active members and 12 sustainings.

I am looking forward to expand the member of Japanese chapter and JOFS. I am dreaming our society and education system becomes as same as United States'.

It is my great pleasure that I could write this report to you, and also pleasure of all Japanese members.

Sincerely,

Sadao Kanagami, JOFS,
President, JOFS
OVER 100 participants attended the Fifth Annual Ophthalmic Photography Conference and Workshop, June 9, 10, 1983 presented by William Beaumont Hospital's department of Ophthalmology, Royal Oak, Michigan. The two day program provided lectures and workshop experience using the most advanced cameras available from Kowa, Topcon, Coherent Radiation and Zeiss. Each participant had the opportunity to expose instant 35 mm Polaroid films and Ektachrome. Kowa Optimed provided overnight processing for all 100 rolls of Ektachrome which allowed photographers to review their efforts.
At the conclusion of the two day course, attendees and instructors enjoyed an evening of dining and dancing at the Sheraton Southfield Hotel which featured two slide/tape presentations by Michel Mehu and John Johnson. Both slide/tape presentations depicted different aspects of ophthalmic photography and some historical material surrounding the origin of the Ophthalmic Photographers' Society.

CLASSIFIED...

POSITION AVAILABLE: OPTHALMIC TECHNICIAN/PHOTOGRAPHER with minimum of 6 months experience in fundus photography and retinal angiography. Experience in I O L calculation measurements, ophthalmic ultrasound and specular microscopy helpful but not necessary. Position also involves preservation of corneal and scleral tissue. Interested applicants should send their resume to:

Personnel Department
Providence Hospital
2435 Forest Drive
Columbia, SC 29204
(803)256-5300

POSITION AVAILABLE: OPTHALMIC PHOTOGRAPHER wanted who can consistently perform high quality stereo angiography. Person should be able to work independently and enjoy varying responsibilities. This is an exciting job in the metro Boston area. Very competitive salary and benefits. Send C.V. to the attention of Mark Berstein, Angiographics, Inc., 189 Wells Ave., Newton Centre, MA 02159, (617)964-5067.

POSITION AVAILABLE: OPTHALMIC TECHNICIAN. We are looking for someone to primarily do refractions and visual fields but will also be involved in assisting ophthalmologists in surgery, fitting contact lenses and back-up the ophthalmic photographer. Requirements are a graduate of an ophthalmic technician school or equivalent experience with a minimum of two years experience doing refractions. Marshfield Clinic is currently third largest private group practice in the nation. It is located in a friendly community of 18,000 people in Central Wisconsin where recreational opportunities abound. The eye department consists of 4 ophthalmologists, 1 retinal surgeon, 2 optometrists, 1 ophthalmic photographer plus other support staff. Position offers a salary range of $18-25K plus an excellent benefit program. Please send a resume in confidence to:

Employee Services
Marshfield Clinic
1000 N. Oak Ave.
Marshfield, WI 54449
(715)387-5126
POSITION AVAILABLE: OPTHALMIC PHOTOGRAPHER. Immediate opportunity in our ophthalmology department. Responsibilities include fundus photography, retinal angiography, slit-lamp photography and external photography, maintain file systems and file inventory. Busy and rapidly growing Department with twelve staff doctors and two photographers. We require 1 year experience as an Ophthalmic Photographer. Certified Retinal Angiographer preferred. Send resume to:

Bill Kay
Technical Recruiter
Cleveland Clinic Foundation
9500 Euclid Ave.
Cleveland, OH 44106
(216)444-2679
An Equal Opportunity Employer
M/F/H/V

POSITION AVAILABLE: OPTHALMIC PHOTOGRAPHER. Experience in developing and printing, performing fundus photography and retinal angiography are desirable. The position also requires the use of an A-scan, B-scan, EEG, visual fields and assisting in the use of our argon laser. Candidate should be a Certified Retinal Angiographer and/or a Certified Ophthalmic Technologist. Interested applicants should send a current resume with salary requirements along with a portfolio demonstrating experiences to:

Roy J. Ellsworth, M.D., President
Boise Retina Lab
999 North Curtis Road, suite 205
Boise, ID 83706

POSITION AVAILABLE: OPTHALMIC/BIO-MEDICAL PHOTOGRAPHER. Minimum three years experience in ophthalmic photography including slit-lamp, fundus, retinal angiography and general bio-medical photography. Must be able to interact between patients and physicians in a clinical/research environment. Priority to background in audio/visual cine and video productions. Resumes only to:

Personnel Director
Estelle Doheny Eye Foundation
1355 San Pablo St.
Los Angeles, CA 90033

E.O.E.

POSITION AVAILABLE: OPTHALMIC MOBILE YAG LASER TECHNICIAN. Southern California. Must know area and be familiar with I.O.L.'s.

Attention!
1983 Academy Attendees

Special discounted airfares to the American Academy of Ophthalmology’s 1983 Annual Meeting have been arranged from most cities for meeting attendees.

These special airfares are **lower** than Coach or Super Saver fares and **ARE NOT AVAILABLE TO THE GENERAL PUBLIC.**

Tickets can be reserved and purchased only through Conference Air Services, Inc. (CAS), the official air travel coordinator for the 1983 Annual Meeting. The fares, available from most cities in the continental United States, are totally unrestricted:

- No minimum stay required
- No advance purchase limitations
- Offered on all Coach seats from **October 25 - November 8, 1983**

**BEFORE MAKING ANY OTHER TRAVEL ARRANGEMENTS,**

CALL CAS TOLL-FREE AT **(800) 336-0227**
(between 9:00 a.m. - 5:30 p.m. EST, Monday - Friday)

In the Virginia and Washington D.C. areas,
call **(703) 528-0114**

CAS will immediately confirm you on any available flight.

Listed below are current (March 1983) roundtrip airfares with the special Academy discount fares noted. Please call CAS for the applicable discount from your city.

**NOTE:** In the event of an increase or decrease in published airfares, the Academy fares will remain lower in most cases. If a lower fare is announced after you have purchased your ticket, please contact CAS to be reticketed. As all fares are subject to change, call early.

Toll-free **(800) 336-0227**
