

**Vidyo**® Vidyo reinvented the model for video conferencing beyond expensive legacy hardware and dedicated networks to provide a powerful, flexible and scalable software-based solution. Vidyo's implementation of scalable video coding (SVC) provides high definition, low-latency, error resilient, multipoint video conferencing with desktop application sharing. Supporting a variety of endpoints, including desktop computers, smartphones and standards-based room systems, Vidyo offers a personal telepresence and web conferencing solution designed to accommodate a variety of workflows and integrated IT environments.

Mediasite provides the most automated, end-to-end platform for creating, publishing, searching and managing enterprise video. With a laser-focus on all things video, Mediasite lets you focus on the bigger picture – transforming education, accelerating training, personalizing communications and amplifying your organization knowledge. As a 100% private cloud offering to OSHEAN members, the solution features integration with Learning Management Systems, LDAP authentication, built in video editor, closed captioning workflow support and an intuitive analytics-reporting engine.

**Value Statement**

OSHEAN is committed to our members, for whom we seek to provide top quality, low cost, high speed telecommunications, internet, and Above the Net services. It is the mission of OSHEAN to continuously seek out technology solutions that best benefit its members. Working collaboratively, we are able to deliver affordable, dynamic services that answer the IT needs of our members.

**Mission Statement**

OSHEAN, Inc. is a non-profit coalition of universities, libraries, K-12s, hospitals, government agencies, and other non-profit organizations dedicated to providing innovative Internet-based technology solutions for its member institutions and the communities they serve.

**Video Commons 2.0**

**Multi-Media Webcasting**

&

**Visual Communications Service**

OSHEAN's Video Commons 2.0 service provides a scalable, proven solution for online learning and visual communication requirements. Through strategic partnerships with industry leaders, OSHEAN architected a virtual private cloud (VPC) of multimedia services uniquely tailored to meet the membership's diverse needs for on-demand web casting, and interactive video/web conferencing applications.

Powered by Vidyo and Mediasite, OSHEAN's integrated streaming service provides the essential tools needed to facilitate face to face interactive web conferencing along with on-demand webcasting applications – such as flipped classroom learning and continuing medical education.

Specifically tailored for performance and resiliency, OSHEAN internetworked the Vidyo and MediaSite cloud data centers as an "ON-NET" service to members. Supported by redundant gigabit network connections, these dedicated and trusted routes offer members unprecedented performance and predictability that cannot be achieved by public cloud service providers.

### **Applications and Use Cases:**

- Lecture capture
- Flipped & blended learning
- Streaming Live Events
- Continuing medical education
- Interactive video conferencing
- Web conferencing and desktop sharing
- Distance learning
- On-demand video webcasting

### **Key Features:**

#### **Media Management & Web Casting**

- On-Demand multi stream playback
- LDAP user authentication
- LMS integrated workflows
- Closed Caption (cc) workflows
- Member branded user interface
- 120 video encoding formats
- Complete API library
- Built-in video editor
- Advanced meta data tagging and searching capabilities
- Usage analytics and reports

#### **Visual Communications**

- Customized portal
- Unlimited user accounts
- Point to point or multipoint video conferencing
- Desktop sharing
- Web conferencing
- Live web casting

### **Package Options**

#### **Video Commons 2.0 Platinum**

##### **Package:**

- 500GB content storage\*
- Unlimited on-demand content streaming
- Custom skin portal
- Visual communication (12 concurrent ports)\*
- Unlimited user accounts
- LMS integration
- AD/LDAP Integration
- Live webcasting

#### **Video Commons 2.0 Gold Package:**

- 100GB content storage\*
- Up to 3,000 on-demand streams/month
- Custom skin portal
- Visual Communication (5 concurrent ports)\*
- Live webcasting

#### **Video Commons 2.0 Silver Package:**

- 50GB content storage\*
- Up to 1000 on-demand streams/month
- Custom skin portal
- Visual communication (1 concurrent port)\*
- Live webcasting

*\*Additional storage & visual communication ports can be added à la carte*
