
Body Temperature is elevated and linked to fatigue in relapsing-remitting multiple sclerosis, even without heat exposure. Sumowski JF, Leavitt VM. Archives of Physical Medicine and Rehabilitation 2014;95(7):1298-1302. This study supports that body temperature is endogenously elevated in patients with MS.

ALS

Electrodiagnosis in persons with amyotrophic lateral sclerosis.

Vestibular deficits leading to disequilibrium and falls in ambulatory amyotrophic lateral sclerosis.

Supported treadmill ambulation for amyotrophic lateral sclerosis: A pilot study.

Cognitive Impairment/Dementia

Physical exercise as a preventive or disease-modifying treatment of dementia and brain aging.

Effects of aerobic exercise on mild cognitive impairment: A controlled trial.

The effects of exercise training on elderly persons with cognitive impairment and dementia: A meta-analysis.

Endurance and strength training outcomes on cognitively impaired and cognitively intact older adults: a meta-analysis.

The influence of exercise on brain aging and dementia.
Lautenschlager NT, Cox K, Cyarto EV. Biochimica et Biophysica Acta (BBA) - Molecular Basis of Disease 2012;1822:474-481, ISSN 0925-4439.
Parkinson’s disease

Promotion of physical activity and fitness in sedentary patients with Parkinson’s disease: randomized controlled trial.
van Nimwegen M, Speelman AD, Overeem S, van de Warrenburg B, Smulders K, Dontje ML, Borm GF, Backx FJG, Bloem BR, Munneke M. BMJ 2013;346:f576 doi: 10.1136/bmj.f576 (Published 1 March 2013). Multicenter comparative effectiveness randomized controlled trial (N=32 community hospitals with N=586 sedentary patients with idiopathic Parkinson’s disease) to evaluate whether a multifaceted behavioral change program increases physical activities in patients with PD.

How might physical activity benefit patients with Parkinson’s disease?

Driving errors in Parkinson’s disease: Moving closer to predicting on-road outcomes.

Effect of exercise on motor and nonmotor symptoms of Parkinson’s disease.

Treadmill exercise elevates striatal dopamine D2 receptor binding potential in patients with early Parkinson’s disease.

Intensive rehabilitation increases BDNF serum levels in parkinsonian patients: A randomized study.

Intensive rehabilitation treatment early in Parkinson’s disease: A randomized pilot study with 2-year follow-up.
The effects of balance training and high-intensity resistance training on persons with idiopathic Parkinson's disease.  

Evidence-based analysis of physical therapy in Parkinson's disease with recommendations for practice and research.  

Effects of exercise on mobility in people with Parkinson's disease.  

When did Ray Kennedy’s Parkinson’s disease begin?  

Consensus-based clinical practice recommendations for the examination and management of falls in patients with Parkinson’s disease.  
van der Marck MA, Klok MPC, Okun MS, Giladi N, Munneke M, Bloem BR. Parkinsonism and Related Disorders 2014;20:360-369.

Forced, not voluntary, exercise improves motor function in Parkinson’s disease patients.  

Structural brain plasticity in Parkinson’s disease induced by balance training.  

Dance for people with Parkinson disease: what is the evidence telling us?  

Ambulation and Parkinson Disease.  

Postural instability and gait impairment during obstacle crossing in Parkinson's disease.  

Bicycling breaks the ice for freezers of gait.  
Cueing training in the home improves gait-related mobility in Parkinson's disease: the RESCUE trial.

Physical inactivity in Parkinson's disease.
