Preface

Dear Colleagues,

SPR welcomes you to Barcelona, the capital of Catalonia, for the 39th International Meeting of our society!

Our meeting has set a record: the number of submissions for this meeting is the highest it has ever been. We expect almost 600 participants from all of the continents. The submitters/ moderators represent 31 different countries.

The scientific program includes 116 Panels (including almost 400 papers), 8 Brief Communication Sessions (comprised of 40 papers), and 2 poster sessions (with a total of 155 posters). All posters can be presented during the day and intensively discussed in the evening sessions on Thursday and Friday. Finally, 10 structured discussions covering fields ranging from cultural aspects of psychotherapy research to training issues complete the program. It should be noted that a large number of submissions are related to this year's general theme "Neurobiological and Sociocultural Contexts of Psychotherapy and Psychotherapy Research."

The meeting will start on Wednesday afternoon at 2 p. m. with a series of Pre-conference Workshops focusing on methodological and research issues. On Wednesday evening (at 6:30 p.m.), SPR's current president, Jacques Barber, will give his presidential address entitled "Toward the Resolution of Core Conflicts in Psychotherapy Research". On Wednesday evening, a welcome reception will be held at the conference hotel. On Saturday evening, the meeting will end with a banquet at the museum of science, an interesting historic place downtown Barcelona.

Please do not miss the Business Meetings of the regional chapters that will be held on Thursday. The International Business Meeting will take place on Friday after lunch.

On behalf of the Local Organizing Committee and the Program Council we wish to thank all colleagues for their submissions and contributions to what we are sure will be a lively and successful conference.
