Meet!**

Access information from 9 Meeting Tracks

MEETING TRACKS	WHAT IS COVERED	WHO SHOULD ATTEND
EMERGENCY RESPONSE 	Current trends and hot topics in the aviation emergency response realm	Airline personnel involved in safety departments, family assistance, GoTeam members, public relations and security personnel as well as manufacturers and suppliers of emergency response related products and services
FLIGHT OPERATIONS 	Pilot supply, recruiting and fatigue risk management. With direction from the Regional Operations Council (ROC), this track collaboratively engages industry stakeholders and government agencies on the sometimes challenging intersection of operations and regulations.	Top-down operations personnel as well as employees from training and safety departments, aviation universities, the FAA and vendors
FLIGHT TECHNOLOGY 	Technology related regulatory and operational matters. The RAA Flight Technology Committee meets regularly throughout the year.	Airline flight technology, flight operations and flight training/standards personnel as well as manufacturers and suppliers
FLIGHT TRAINING 	Latest and greatest in computer-based training, simulators, software and techniques	Airline training, operations and safety departments, training providers, simulator manufacturers, vendors, aviation universities and the FAA
GROUND SAFETY 	Safety matters of special concern to ground operations	Ground, inflight, maintenance and safety personnel
INFLIGHT 	Best practice advancement and industry collaboration sessions for cabin inflight professionals	Airline inflight operations and training managers, regulators and organizations providing the industry with products and services supporting the inflight community
MAINTENANCE 	Operational experiences and lessons learned regarding maintenance trends, processes, policies and procedures	Airline maintenance and engineering personnel, manufacturers, suppliers and MRO organizations
SAFETY 	SMS, safety enhancements, runway safety, fatigue and human factors	Top-down safety department personnel as well as for employees from operations, training, maintenance departments, the FAA and anyone interested in aviation safety
SECURITY 	Security directives, security policies, as well as best practices and procedures	Airline security professionals (AOSCO), their alternates, employees that have security functions like safety and inflight managers as well as manufacturers and suppliers of security related products
