

August 27, 2009

To whom it may concern:

Group purchasing organizations (GPOs) and suppliers have been partners in serving the healthcare community, forging mutually beneficial partnerships that help reduce the costs and improve the delivery of quality healthcare.

As a smaller supplier with limited resources, our partnership with **MY GPO** has been invaluable in marketing our products and driving the growth of our company. Working with them, we have gained tremendous value, expanding our markets, growing market share and moving tremendous volume.

We feel any restrictive legislation affecting GPOs would be damaging to the healthcare supplier community and adversely impact the cost and quality of healthcare. As we approach healthcare reform, please know that changing the way GPOs work at this time is a step in the wrong direction.

Sincerely,

A handwritten signature in black ink, appearing to read 'B. Nelligar', is written over a faint, illegible printed name.

Bill Nelligar
