
SPOTLIGHT ON EMERGING CONTRACTORS

Rocky Mountain Boiler Services, LLC

Rocky Mountain Boiler Services (RMBS), located in Monument, CO, is an SBE- and EBE-certified business specializing in industrial and commercial boiler service and repair. Patricia Mansfield, the owner of RMBS, recently participated in the SFAA/USDOT Bonding Education Program (BEP) in Denver.

Before the BEP, the company did not have bonding, and Patricia did not know much about it. Through the one-on-one meetings with surety professional during the BEP, RMBS established a relationship with Ramirez Bonding and now have bonding. RMBS now is working on a job with Johnson Controls at the Denver International Airport central power plant, a job that required bonding.

Patricia said, “The BEP has been wonderful in terms of the instruction we have received on accounting, bidding, and estimating, but especially on bonding. I got a call recently from a company that asked us to bond, and we wouldn’t have known where to turn without this information. So, it has been fortuitous in its timing. Thank you!”
