

Connor Fitzpatrick
Chief Operating Officer
CrowdRx, Inc.
New York, NY

Organization Description:

Led by Dr. Andrew Bazos, a Harvard A.B., Yale M.D., and Columbia-trained orthopedic surgeon specializing in sports medicine, our team of emergency physicians and public safety experts prescribe and deliver medical services for large gatherings throughout the U.S. CrowdRx offers physician-led and medic-level medical coverage, standby ambulance, first aid stations, flight paramedics and nurses, and life support and emergency management courses. Additionally, it provides data collection, reporting, consulting, and analysis services. The company caters to multi-day music festivals, professional sporting events, and small venue shows. Its clientele include Yankee Stadium, the US Open, Live Nation, AEG, Madison Square Garden, Radio City Music Hall, and The Beacon Theatre.

Volunteer - PALS for Patriots
Volunteer AEMT and Instructor - Darien EMS

Brief Biography:

Connor Fitzpatrick couples his background in investment management consulting with his extensive experience in emergency services to build strategic partnerships with urgent care centers and hospital systems nationwide. Connor has served as Medical Operations Director for some of the world's largest events including Burning Man, the US Open, Madison Square Garden, and Yankee Stadium. Additionally, Connor is a nationally recognized speaker on event safety

and medical services and has appeared on CNN's "This is Life With Lisa Ling," at the Event Safety Summit, Mass Gathering Medicine Summit, Live Design International, and is guest faculty for the International Association of Venue Managers. Connor led the initiative to license the first remote and temporary urgent care facility, as an "Independent Center for Emergency Care" at Burning Man in the State of Nevada. Connor co-founded Echo Response Technologies LLC, which develops mobile applications that provide tactical tools to emergency first responders. Connor graduated from Cornell University, earning a B.S. in Applied Economics and Management. He volunteers as an instrument-rated pilot for Patient Airlift Services and as an Advanced Emergency Medical Technician Instructor and ALS Supervisor. He is also certified by the Department of Homeland Security as an Incident Response to Terrorist Bombings instructor, by CONTOMS as a Tactical EMT, and as a Connecticut POSTC Police Instructor.
