Brighton NY Citizens Award
Zoobilation corporate chair

Brief Biography:

I enjoy the excitement and constant activity of urgent care. I enjoy seeing patients from 3 months to 103 years old. I love the challenge of making patients comfortable when they are most nervous and panicked. As urgent care physicians, we are at the front lines of the Medical Community. We must be strong in our clinical skills in order to avoid sending critical conditions home, we must be able to put patients at ease in moments, and we must answer to PCPs, ED physicians, and specialists as we often care for patients who are being managed for their conditions by a larger team. While working independently, we must maintain a broad and up-to-date knowledge base and be cognizant, as well, of the social issues that our patients confront in order to access medical care. We may be the only physician our patients see, often for many years, and it is our job to provide high quality care and give our patients a positive impression of the medical field we all comprise.
