

## CAPABILITIES STATEMENT

### We Despise Inefficiencies

2020vet offers intelligent logistics optimization solutions identifying supply chain vulnerabilities, managing risks and multiple interactions in a complex extended value chain through experienced personnel and innovative IT solutions with an emphasis on hiring and assisting Veterans reintegrate successfully. We cover every phase of the supply chain from strategic planning, acquisition, inventory and vendor management, assembly, packaging and print, fulfillment, distribution, customer care and reverse logistics. Along with increased supply chain complexity inherent in today's global economy follows the risk of disruptions and challenges related to compliance, high cost of management and the uncertainties of hidden expenses. By taking ownership and adding logistical value to our clients, we simplify the supply chain and create real-time visibility, management and control. We serve our customers' need for a streamlined, resilient, secure, traceable and sustainable value chain.

### Project Profiles

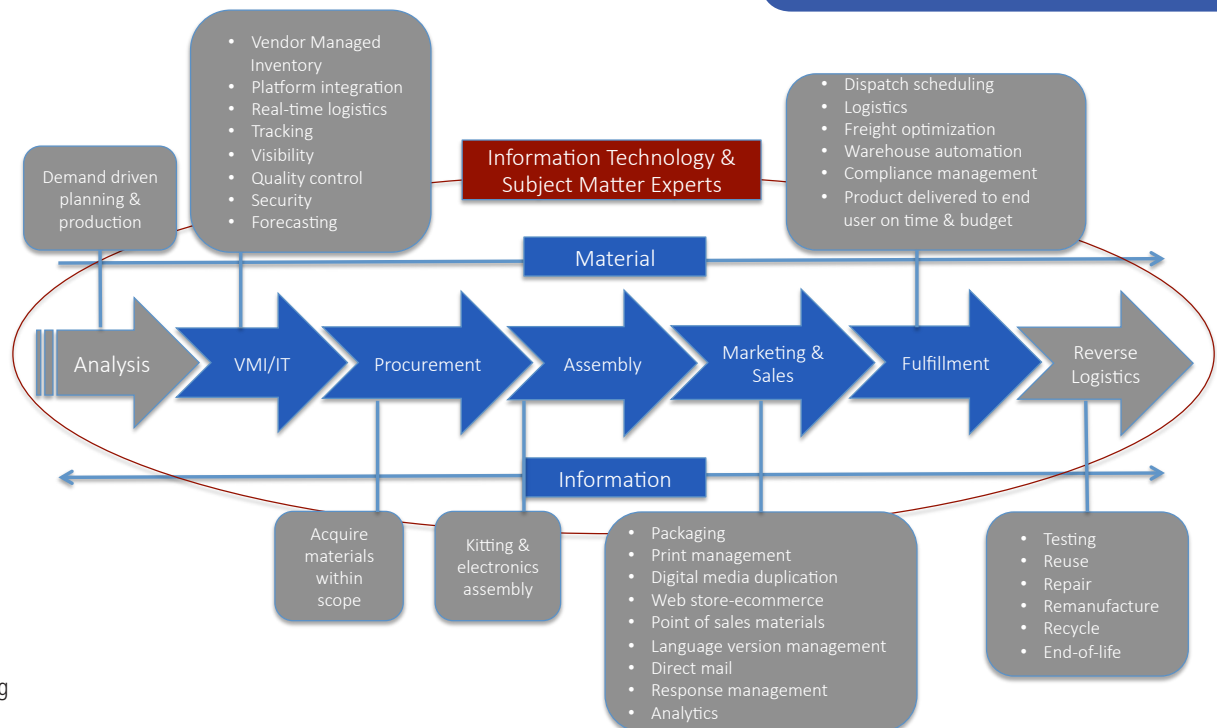

- California First5 Program-Distribute information in English and Spanish statewide to over 400,000 new parents annually through inventory management, data integration, customer care, kitting, fulfillment, packaging and delivery services.
- DLA-5-year time sensitive media duplication and delivery subscription service for hundreds of thousands of warfighters providing oversight and security.
- California Department of Consumer Affairs-Information campaign; print, assemble, package, data capture and distribute *Notice to Motorists* signs across the state.

### Capabilities

We make the complex simple through our award winning team of account managers, supply chain experts and engineers along with our cutting edge technology solutions. 2020vet is located in Silicon Valley, California with a satellite office in Washington DC. We have experienced personnel highly trained in strategy and risk mitigation along with innovative technologies that reduce disruption, costs and environmental footprints. 2020vet increases oversight, speed, security, flexibility and quality, giving our customers competitive advantages needed in an ever-changing business environment. We take care of our clients by taking care of their customers on time, on budget with zero errors and disruptions. Our 'Lean' practices reduce waste and inefficiencies in terms of unnecessary freight runs, subpar facilities and excess packaging. Combining and optimizing functions within a supply chain and collaboration amongst various disciplines within an agency produces positive impacts on the environment and the bottom line.

### Key Differentiators

- Experts
- Corporate Certifications
- Individual SECRET Clearance
- Strategic Partners
- ISO Facilities
- Total Solution Provider
- Flexibility
- Innovative Technologies
- Customer Brand Protection
- Quality Assurance
- Life-Cycle Cost Advantages
- Just-In-Time Solutions
- Veteran Led
- Large Project Capacity
- Proprietary Systems
- Cloud Platform
- Strong Past Performance
- Fluent in Government Contracting
