FULL SPEED AHEAD

Register Today for Advanced Concepts of Bearing Technology Course!

Advanced Concepts of Bearing Technology
June 8-11, 2015
Marriott Ann Arbor Ypsilanti at Eagle Crest - Ypsilanti Township, MI

This course builds on the foundations of the essential course and challenges the experienced engineer in areas such as failure modes, friction & wear, fatigue life calculation methods and load distribution. This is an exceptional course for engineers with 2-3 years work experience in bearings or past attendees of the Essential Concepts of Bearing Technology.

PRODUCT SHOWCASE

SILICON NITRIDE AND VACUUM MELTED Precision Balls

Silicon Nitride balls are non-corrosive, anti-magnetic and excel in low noise, high rigidity, and high load carrying applications. These balls can be run dry in a vacuum environment and up to 500A° F without lubrication. AISI type 440C/VM stainless steel balls afford the advantage of reduced impurities for extreme applications.

NSK Continues to Contribute to a Sustainable Planet

IT Business Net (05/12/15)

NSK Americas has released its sustainability achievements for 2014 and was honored with an award for excellence in the environmental reporting category at the 18th Environmental Communication Awards. The company saved 27,795 trees, 757,005,000 gallons of oil, 11,445,000 gallons of water, 39,240 gallons of gasoline, and 6,703,500 kilowatt hours of electricity. "NSK continues to measure our actions and achievements to realize a sustainable society, while delivering value to our customers and the communities in which we operate," chief executive officer Brian Lindsay said. "Our actions also include open communication about our environmental goals which will hopefully encourage other manufacturers to recognize the economic and human benefits of smart, sustainable business practices."

SPECIALTY RING PRODUCTS

Precision Forging and Machining
Seamless Rolled Rings and Shapes
For Bearing, Aerospace and Industrial Applications

Essential Concepts of Bearing Technology

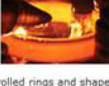

October 27 - 29, 2015
Marriott Ann Arbor Ypsilanti at Eagle Crest - Ypsilanti Township, MI

This course will give you an overview of the bearing industry as well as basic bearing types and applications. Knowledge of the key players, bearing types and terminology will ensure that everyone has a basic knowledge of the industry upon arrival.

PRODUCT SHOWCASE

North America's Largest Bearing Inspection Facility
Wondering whether your bearings are performing to spec? We can help.
Contact NES, North America's largest bearing inspection and test facility, for a consultation. **MORE**

Precision Forged Rings and Machining

Specialty Ring Products is a premier source of forged seamless rolled rings and shapes used in the most demanding bearing, aerospace, and defense applications.
